  Conclusion 20

Survey of the CLP area 21
Bibliography 71
Appendix: Evidence of Gaelic in the 18th and 19th centuries 75
Abbreviations
A Antiquity
CLA Clackmannanshire
CLD Callander parish
CLP Callander Landscape Partnership
DLE Dunblane and Lecropt parish
en existing name
G Gaelic
KMA Kilmadock parish
KXM Kilmahog parish
LXY Leny parish
P Pictish
PER Perthshire
PMH Port-of-Menteith parish
S Settlement
Sc Scots
SSE Scottish Standard English

In the first line of each entry the head-name four-figure grid reference has been given along with the relevant parish abbreviation, shown above, and the following abbreviations indicating what the name refers to: A = antiquity; O = other (e.g. bridge, road), R = relief feature; S = settlement; V = vegetation.

Note that in the analysis line, the Gaelic spellings conform to the modern spellings found in the SQA Gaelic Orthographic Conventions. The modern forms of Gaelic personal names are taken from Colin Mark’s Gaelic-English Dictionary (London, 2004). A name preceded by * indicates a hypothetical unattested form.

Acknowledgements

I had an enormous amount of help from the Callander Landscape Project, in particular Dr Ross Crawford who was generous with his time and helped smooth things along. A special thanks to Professor Thomas and Dr Simon Taylor of the University of Glasgow for their assistance with the more problematic names, and to James Westland of http://www.mullgeology.net for his assistance on interpreting aspects of Highland Boundary Fault geology. Finally, my most grateful thanks should go to the volunteers who helped with many aspects if the project, in particular Ross Wood, Sarah Scott, and Mairi Osborne who each looked at Cailleach and Fenian legends, the Gaelic language, and the Register of the Privy Seal (RSS); the results of their research can be found within this document. Any errors are of course my own.

The Gaelic Place-names of Callander’s Landscape

The basic aims of Callander’s Landscape Gaelic place-names project were as follows:

- To deliver a report on, or create a ‘Word Hoard’ of, the Gaelic place-names of Callander, showing what they can tell us of past land use, the environment, and the Gaelic language in Callander and the surrounding area;

1 http://www.sqa.org.uk/sqa/files_ccc/SQA-Gaelic_Orthographic_Conventions-En-e.pdf
To investigate whether there are place-names elements that are unique or nearly unique to Callander;
To use the place-name data to support artistic interpretations of Callander’s Gaelic landscape;
To deliver workshops on the use and research of place-names to interested adults;
To upskill volunteers in how to undertake place-name research;
To deliver walks using place-names as a guide to understanding the local landscape.

Community Engagement

Community engagement is now considered an essential part of place-name studies. In academic circles this is now usually called Knowledge Exchange, and engagement with the local community is often where scholars will find answers to complex and perplexing questions they may have.

Community engagement took the form of a workshop in December 2019 with the aim of introducing people to the subject of place-names and how this work is carried out. This includes learning about:
• the language history that make up place-names in Callander – i.e. British/Pictish, Gaelic, Scots/Scottish English
• The processes by which scholars elucidate the etymology and meaning of a name – this is sometimes easier for some names than for others
• The different kinds of sources available, such as old maps and estate plans, parish accounts, medieval government and monastic records, among others. Awareness of the strengths and weaknesses of such documents are also discussed.
Introduction

Imagine there are no place-names. How would you find your way around? How would you book a holiday? How would you define your identity in relation to another place? Without place-names it is almost impossible to do any of these things. To go somewhere you need a place-name, or at least a name of some sort, whether it is Aberdeen or Granny’s house. You could not book a flight anywhere without a place-name, and to say where you come from requires a place-name, whether that name is a country, city, or hamlet. Without place-names we are quite literally lost! Place-names have become markers in our mental map of the World, and we can use them to make sense of where we are. If we live in central Scotland watching a programme about the Cold War in the 1960s, for example, we know that London is to the south of us, Moscow is to the east, and Washington is to the west. Locally, we instinctively use place-names to find our way around, whether it is to visit shops in Stirling, or visit relatives in Strathyre, as I often do.

Originally, however, place-names meant something, and once we crack the code, as it were, inherent in each name, we can use them to tell us about the past. Many place-names in Scotland can be dated to the medieval and early modern periods, in other words before the industrial revolution of the mid to late 18th century. Take Perth, for example. That name tells the place-name scholar two immediate things: one is language; the other is environment. The language of the name is Pictish and so has to date before about 900 AD, because by that time Pictish was well on the decline due to political reasons and Gaelic had become the naming language of that area. The name itself means a ‘wood’ or ‘cope’. This tells us that the surrounding area was devoid of trees, because you would not name a wood within a wood. But there are other perths in Scotland, there is Logie Pert near Montrose, and Partick in Glasgow and Larbert near Falkirk are also perth-names (Watson 1926, 356–7).

Place-names are a window through which we can glimpse Scotland’s past. They contain a large amount of information about such topics as people, the landscape, how that landscape was used, belief, and of course language. For place-names are words and once we can understand what a place-name means we can begin to use it to tell us about the past. We may use the analogy of how an archaeologist can build up a picture of the past using material remains – the remains of a sword found in a field, for example, must mean a smith of some kind, who can work metal. Metal necessitates mining for iron ore, which apart from miners also entails a group of people working in fields to feed the miners, and this usually leads to someone having control and enforcement – after all, swords are built mainly for violence (or at least the threat of violence) – over the means of production and farming. In other words, the archaeologist can show there was some kind of society that enabled people involved in crafts and non-agricultural toil to be supported by those who worked on the land. A similar exercise can be done with place-names. While a great deal of effort and work is needed to bring to fruition the results of an archaeological excavation or survey – often specialists are needed to produce reports on finds and dates – a toponymist (place-name specialist) can often cover a larger amount of ground relatively quickly and cheaply. More importantly, however, is that by applying all three of the ‘historical’ disciplines of History, Archaeology, and Onomastics (study of names) we have a powerful set of tools at our disposal that enables us to more fully understand the past landscapes and history of an area. For more on the collaboration between the different historical disciplines see Woolf (2009) and Wainwright (1962), but it is also worth quoting at length from a study by Richard Jones and Della Hooke: ‘The holy grail of landscape studies] remains true interdisciplinarity, where the separate scholarly agenda of historians, geographers, archaeologists, onomasts (name scholars) and others can be combined together on an equal footing, where methodologies from one area can be borrowed by another and where the questions addressed must remain flexible so that they can react to the fast-moving and ever-
changing research environment created. The complexities of achieving this end should not be underestimated, but it is surely worth striving for, since the rewards are potentially high’ (Jones and Hooke 2009, 42).

The project, part of the Callander Landscape Partnership (known as Callander’s Landscape), with the Loch Lomond and the Trossachs National Park as the lead partner, looked at the place-names of an area some 14 km by 8 km with Loch Lubnaig and the River Teith flowing through the centre (see map on page 2 of this report). The main focus is on the landscape on either side of this water-system, which itself is divided into two by the Highland Boundary Fault; the area to the north of the fault is classic Highland scenery, a high craggy mountainous landscape intersected by steep-sided glens; the area to the south is a contrast of gently rolling hills and plains. It was decided to look at about 150 of the Gaelic place-names in the area using current OS Explorer 1:25,000 scale maps as the base. There are two maps which cover the area – namely, OL46 (formerly E365), and E366. These were supplemented by the OS 6 inch 1st edition map for some historic names, plus other place-names of interest, including names which help illustrate the history of the medieval church in the area. It was also decided the topographical names – hills, burns, plains, and the like – be examined using John Murray’s categories of names (Murray 2014; and see below). It is clear from this survey that the Callander’s Landscape boundary is very much a Gaelic landscape, for the vast majority of the place-names are in Gaelic; Scots or Scottish Standard English place-names are quite rare. Even more rare are place-names of the British language (see the section on language below for more a detailed definition of this language). Most of the Gaelic and British settlement-names are rendered in English orthography and can be difficult to interpret from their current spellings; the topographical features are mainly given in Gaelic orthography. There are a number of place-names that are shown on maps earlier than the OS 6 inch 1st edition which have now disappeared. This is presumably due to clearance in the eighteenth and nineteenth centuries, as many parts of Menteith and neighbouring areas, like much of Highland and Island Scotland, was cleared of people to make way for sheep or sporting estates (Richards 2000; Devine 2018; Taylor 2016).

While archaeology and historical sources are rightly the bedrock of the study of Scottish society in the medieval and early modern periods, and are likely to remain so for some time, it has recently been said by Dauvit Broun, Professor of Scottish History at the University of Glasgow, that: ‘the most abundant source for rural society, however, is place-names. Not only do these reveal aspects of everyday life that were both sufficiently distinctive and routine to give rise to place-names, but a critical consideration of how they were coined and sustained can give us access to the social and environmental forces that moulded a community’s habitat and sanctioned its sense of itself’ (Broun 2014, 107-8). Place-names can be a great aid in helping historians and archaeologists understand rural settlement and society in the Middle Ages and beyond to the cusp of the Agricultural Improvements and Industrial Revolution in Scotland in the late eighteenth and early nineteenth centuries. Not only do they give us clues to landscape use, but they also indicate important religious and social organisation that would otherwise have gone unrecorded (Hall, Henderson and Taylor 1998, 139). While archaeology is invaluable in helping us understand the past, and of course is the main tool in helping us understand the prehistoric past, when it comes to the medieval period place-names are one of the main resources. It has been recently stated: ‘if we want to know more about social developments before there is a sufficient density of documentary record to shed light on the lives of most of Scotland’s inhabitants, then we must look to place-names as our chief resource. This is true for the entire Middle Ages, not just the period before 1100’ (Broun 2006, 14).

Archaeologists often speak of buildings or sites being ‘reused’; a good example is Jarlshof in Shetland, where the site, and presumably materials, of an Iron Age wheelhouse/broch were reused in the Viking period. Perhaps we should speak of landscapes being reused too. For
example, in Glenshee PER there are buildings at Lair which date back to the Pictish period (http://www.socantscot.org/research-project/glenshee-archaeology-project-pictish-longhouse-excavation), but the place-names in the glen are overwhelmingly Gaelic with an admixture of Scots. We could say that place-name scholars are almost like archaeologists, but with words instead of material remains.

A fundamental tenet of place-name studies is to ascertain the pronunciations of places since the echoes of earlier languages can be found in the stress patterns of place-names. Time constraints and social distancing restrictions due to the COVID-19 outbreak have been such that I have been unable to carry out this kind of research for the upland areas, however I did manage to gain pronunciations of many of the settlement-names when I studied the area for my PhD.

Sources
Maps
Maps are one of the first items a toponymist turns to when looking for the place-names of an area. Apart from the place-names themselves, modern maps give a convenient visual representation of the landscape in which the place-names are situated. The most valuable maps so far as place-name studies are concerned, are old maps and plans. Most useful in particular are those maps dating from the first edition of the Ordnance Survey or earlier. The two main earlier maps used for this survey are Robert Gordons’s A map of the basin of the River Forth, down to the widening of the estuary near Alloa (1636-52; hereafter Gordon 51) and John Stobie’s the Counties of Perth and Clackmannan (1783). General William Roy’s Military map of c.1750 is limited in that it contains far fewer place-names than Stobie but was nonetheless valuable in many respects. These maps were much less useful for hill- and burn-names for which we are reliant almost totally on later maps. The base map, however, is the current 1:25,000 Ordnance Survey Explorer coupled with the relevant sheets of the OS 6 inch 1st edition published in 1866. It is clear that when looking at Stobie there were many more settlement-names than there are now; as has been noted above, this is mainly due to agricultural improvement and resulting clearance in the late eighteenth century. It should be noted that the Ordnance Survey Name Books are only available for the area immediately around Callander; the Name Books for the rest of Callander parish were destroyed when the German Luftwaffe bombed the Ordnance Survey headquarters and stores in Southampton on the night of November 30th 1940.

Documentary sources
The documentary sources used are the main printed royal sources for Scotland, namely the Register of the Great Seal (Registrum Magni Sigilli Regum Scottorum, or RMS) and Retours (Inquisitionum ad Capellam Domini Regis Retornatarum, quae in publicis archivis Scotiae adhuc servantur, Abbreviatio). Other sources included MacFarlane’s Geographical Collections (Geog. Coll.), the Old and New Statistical Accounts (OSA and NSA), and the Ordnance Survey Name Books, which provide information about place-names and building-names on the first edition Ordnance Survey mapping which took place in the mid-19th century; where possible most entries end with a quote from the OS Name Book (complete with spelling and grammatical errors) showing the situation when Menteith was surveyed in 1860s. In the National Records of Scotland there are large numbers of documents, including estate plans, relating to Menteith, and although I did not look at them for this project, partly due to time constraints and also due to the general lockdown caused by COVID-19 outbreak in March 2020, the notes I had taken during my PhD were able to compensate.
Gaelic Place-names in Callander: A Thematic Overview

Place-names can help historical researchers and archaeologists with many aspects regarding the historic landscape of an area. A full historical and analytical survey of the place-names of an area can uncover many aspects of this district’s past than archaeological or historical survey alone can hope to reveal. One of the main advantages of a place-name survey is that it can cover a relatively wide area fairly quickly. However, it does require a researcher who has at least a working knowledge of the main languages of the area being studied, in this case British/Pictish, Gaelic, and Scots. It is hoped that this survey will form the basis of a fuller survey of Menteith as part of volume 1 of the place-names of Perthshire, which would be published under the auspices of The Survey of Scottish Place-Names, much like the Place-names of Fife and the Place-names of Kinross-shire.

Place-names can give an indication of an area’s past landscapes, whether natural or human influenced; past social organisation and land divisions can be revealed; beliefs, both religious and mythical are contained in the names of many features, whether they be hills, burns or vegetation. Indeed, so varied are the topics for place-name research that a recently published book on the Gaelic landscape by John Murray gives the following categories for looking at place-names in the landscape:

- landforms – mountains, hills, hollows, valleys
- hydronomy – river and loch-names
- climate, season, sound and time
- landcover and ecology – flora and fauna (i.e. wild animals and birds)
- agriculture – crops, domestic and farm animals
- buildings and settlement
- church and chapel
- archaeology and cultural artefacts
- people and occupations
- events, administration, justice, and hunting
- legend and the supernatural
- routeways
- colours

All of these categories can also be described in terms of colour, pattern, texture, form, size and position, and through metaphor using the anatomy of the whole human body (Murray 2014, 209-10). Note that in the analysis below details of many of the names discussed can found in more detail in the survey following. Assume all elements are Gaelic unless otherwise stated. In the main text the Gaelic forms of names are italicised where possible.

Many, if not all, of these categories can be found in the CLP area. Like much of Scotland, both Highland and Lowland, the area around Callander experienced a movement of people off their ancestral lands where their families had been settled for generations and out into villages, towns, and cities across Scotland, as well as emigration to England and overseas, as the area was ‘improved’ and cleared of people during what has become known to posterity as the ‘Clearances’. Fortunately, unlike other upland areas, such as the Ochil Hills, the Ordnance Survey chartered the area at a time when many of the place-names were still in the memories of

---

2 I have adapted some of these categories slightly.
3 It is surely one of the great ironies of history that despite the best efforts of the British state from the reign of James VI onwards to eradicate the Gaelic language, it was an arm of that very state, the Ordnance Survey, that
Gaelic-speaking people who lived in the area, and consequently much of the vivid culturally- and agriculturally-named landscape has been saved, and there is a great deal of material to help us capture the remnants of past uses of the land in the CLP area. Fuller details of all the place-names mentioned in this brief synopsis can be found in the survey following on from it.

**Language**

Underpinning a study in place-names is, of course, language. Language itself is a legitimate reason for studying the landscape, for as Thomas Charles-Edwards wrote ‘language mirrors society. Not only do languages contain systems of social classification, changes in whole languages are part of the process by which societies change’ (Charles-Edwards 1972, 4; cited in Woolf 2009). Place-names are, then, the ideal vehicle for charting this change. The chronology of the main languages of the place-names of the area is British, Gaelic, and then Scots. Despite the existence of documentary evidence of Norse activity in Menteith in the mid-13th century (Cowan 1990, 121 quoting ER i, 24), there is no evidence of any permanent Norse settlement, as least so far as the place-names are concerned. The vast majority of the places had been named by the time the Ordnance Survey were active in the area in the mid-19th century, there are very few places that have been named since then, and most of those are in Scottish Standard English. If we are not sure when Gaelic began, then we can say that demise as the everyday language of Callander and Menteith probably began with the arrival of Anglo-Norman lords in the 12th and 13th centuries. Over the next few centuries Scots speaking nobles and landowners gained much of Menteith, including the Livingstons of Callendar near Falkirk, who seem to have influenced, at least in part, the change of Callendreth to Callander in the mid-16th century (Watson 1926, 106). The Scottish Crown had many lands in the area, including Glen Finglas; the Scots speaking officers of the Crown were responsible for first writing down many of the places we see today. Another dynamic in the decline would have been the activities of the Church, with a major centre at Inchmahome, which had the rights to the kirk at Callander from 1238. However, even in as late as 1564 we encounter people in the Lowland area who cannot speak Scots. In a dispute over her lands, Jonet McLauchlane, a monolingual Gaelic-speaking heiress from Letter in the northern part of Port-Mentieth parish, chose to have Robert Buchannan of Leny ‘sworne lelalie [lawfully] to interpret the erss [Irish] toung and leid [language] in scottis be ressone scho spak in the erss leid’ (NRS GD112/1/155).

Another factor in the decline of Gaelic was undoubtedly the military roads built by General Wade and others during the Jacobite Rebellions. These roads assisted with trade, droving, recruitment into the British Army and the service of the Empire, and, along with the railways in the 19th century, helped facilitate tourism. This contact with the Lowlands to the south accelerated the decline of Gaelic. We can get an idea by looking at the Annexed Estate paper and the Old and New Statistical Accounts, all of which are detailed in the Appendix to this report. Despite this, however, some of the place-names – such as Meall nan Saighdear ‘lumpy hill of the soldier’ and Drochaidein Ban ‘small white bridge’ – a bridge on Wade’s Road from Callander northwards via Loch Lubnaig – must have been named at the time of the Jacobite rebellions, showing that Gaelic was still a vibrant naming language in the 18th century. We must remember that the population of this area was much more spread out than it is today and the glens would have been teeming with people who would have used Gaelic in their everyday lives. In 1775 the Annexed Estate papers show a sizeable Gaelic speaking population in the area, including at Bochastle, where there were 84 people staying at the settlement there; 35 were monolingual Gaelic speakers.

---

4 My thanks to Norval Smith of the University of Amsterdam for this reference.
The Ordnance Survey has undoubtedly helped preserve the place-names of Callander and the rest of the Highlands, and their survey in Menteith in the 1860s still forms the basis for the vast majority of the place-names on current maps. However, much has been lost. When the great place-name scholar, W.J. Watson was collecting the stories and pronunciations of Gaelic place-names in Menteith, he used local knowledge, but was aware it was fast disappearing: ‘the Gael is acquainted with the name of each place in the region to which he belongs, not as they have been mangled by the English language, but as they have been transmitted of old. ‘I am familiar,’ said Parlan MacPharlain to me as we sat on Loch Venachar side, ‘with every stone and ditch and hillock between Callander and Inversnaid.’ And he spoke truly. Parlan has died, and there’s no one to replace him’ (Newton, 2009, 297).

Landforms – mountains, hills, hollows, valleys

The landscape was formed by the Highland Boundary Fault (HBF) which bisects the area, and by the movement of ice during the most recent ices ages. The HBF is the remains of an ancient sea called by geologists the Iapetus Ocean which was located between three main tectonic plates called Baltica, Avalonia and Laurentia. The sediments between Avalonia and Laurentia were pushed up and metamorphosed to give the Highlands, during a mountain building episode about 390 million years ago. The Highland Boundary Fault, which is so well seen at Callander, happened sometime later, although there is much that is unknown about the timings, duration, and degree of displacement of this complex geological feature. The rocks would originally have been deposited as sediments in an ocean basin, but metamorphism has twisted them into all sorts of orientations, and led to rocks such as shales becoming slates, sandstones becoming quartzites, with schists representing grain sizes in between.5

This dramatic landscape is reflected in the place-names, particularly in the Highland part of the study area. Names were needed to navigate and make sense of an area full of hills and valleys of various sizes and shapes, as well as numerous bogs, and rivers and burns. Gaels have a profusion of names for hills and valleys and their vocabulary is well used even among the settlement-names in the CLP area. Here there are many of the different Gaelic words for hills, including beinn, meall, and creag. Another common landform element is coire. Ardchullarie and Ardndavie both contain G àird ‘height’ or ‘promontory’. Ardncregann, a modern house name, and Balachraggan both contain G creagan, a diminutive or plural of G creag ‘rock, crag’, and Balachraggan sits between two rocky outcrops. Creag is quite productive in the CLP area, occurring at least seventeen times, including Creag na h-Iolaire ‘crag of the eagle’ on the slopes of Ben Ledi and Creag a’ Chaibeil ‘crag of the chapel’ near St Bride’s Chapel’. Callander Craig contains Scots craig, a borrowing from Gaelic creag, in the same way that other Gaelic elements like gleann and loch were borrowed into Scots as glen and loch. Another productive element in the CLP area is G tom ‘knoll, small hill’. This occurs at least 13 times, including Tombea (in Gaelic Tom Bheithe) ‘birch hill’, a now lost settlement near Anie, and Thomasgreen, on the hills near Braenly, probably for Tom an Sgriodain ‘hillock of the scree or stony ravine’. Among the higher hills meall ‘lump’ is common in much of Perthshire and occurs six times in the CLP area. Meall Biorach is the pointed lumpy hill, and Meall Odhar is the ‘yellow lumpy hill’. That most iconic of Scottish hill-naming elements beinn ‘mountain, peak’ and anglicised as ben. It is usually reserved for large or dominant hills. Its etymology means ‘horn’ in the sense of ‘jutting out’. The element is surprisingly not that common in the CLP area occurring only in Beinn Bhreac ‘speckled mountain’ and in Ben Ledi and Ben Gullipen. Another hill-element is stùc ‘pinnacle’. It is most famously found in Stùc a’ Chroin, the mountain about nine km north of Callander, and just outside the CLP area. Within the area are Stùc Dubh and Stùc Odhar ‘black pinnacle’ and ‘dun-coloured pinnacle’ respectively. The

5 My grateful thanks to James Westland of mullgology.net for his help in understanding this complex geology.
opposite of peaks are of course hollows. And there is one element that abounds in the CLP area, and indeed across the Highlands, and that is *coire*, a word ultimately meaning ‘cauldron, kettle’, and referring to land which has been scoured and hollowed out by glaciers during the Ice Ages. The element occurs thirteen times in the CLP area including at Coireachrombie, in Gaelic *Coire a’ Chrombaidh* ‘corrie of the Crombie’ (where Crombie means ‘bent place’), perhaps referring to a bend in an adjacent burn. Nearby is *Coire Carnach* ‘Corrie of Chaorunnach’, a corrie on the lands of the settlement of Chaorunnach ‘rowan tree place’, near the farm of Stank. *Coire Molach* is ‘rough or hairy corrie’ perhaps alluding to a heather covering of its slopes. *Coire Buidhe* is ‘yellow corrie’, due to the vegetation or perhaps to the underlying geology.

**Hydronomy – river and loch-names**

While the mountains loom large, the areas where most people live are largely dominated by water. Two river systems, the *Garbh Uisge* and *Eas Gobhain*, meet just to the west of Callander. These rivers flow out of two lochs – the *Garbh Uisge* flows out of Loch Lubnaig ‘loch of place of curves or bends’, from G *lùb*, OI *lúb* ‘bend, twist’, referring to its boomerang shape. *Eas Gobhain* flows out of Loch Venachar ‘horned loch’; the name contains G *beann* ‘horn or point’, referring to the shape of the loch at its eastern end. *Garbh Uisge* is ‘rough water’ and it is certainly that when in spate, especially at the Falls of Leny. Along its course are the spectacular Falls of Leny; it presumably had a Gaelic name, but I have not come across one. *Eas Gobhain* is ‘smith’s cascade’, perhaps due to a legend. The two rivers meet in a flat, easily flooded area just below the HBF at Leny, deriving from G *Lànaidh* ‘damp meadow; swampy plain’, and when the two rivers are swollen by heavy rain or snowmelt, the name Leny is apt. An early name, probably Brittonic or Pictish, is the Keltie Water. This has the old Celtic *caled* ‘hard’ at its root. Quite what is ‘hard’ about such rivers is difficult to say (it is more commonly found in Calder/Cawder river-names which are found throughout Scotland). Is it because they are particularly rocky? Or is it to do with the force of flow of such rivers as the punch their way through the landscape? It is notable that the Keltie Water flows through a steep-sided glen which contains the Bracklinn Falls. As well as being in river-names like Calder, *caled* is also the root of the Caledonian tribe and may be in the name Callander itself. A common element throughout Scotland where Gaelic was the dominant language is *allt* ‘burn, stream’. It only occurs four times in the CLP area, but there are at least another sixteen in the rest of Callander parish, plus another three over the border in the uplands of Kilmadock parish.

The CLP four are *Allt Gleann Baile Mhuilinn*, now Milton Glen Burn, but still an *allt* in the 1860s; *Allt an Tuim Bheithe* ‘burn of the birch hill’; *Allt an Luirge* ‘burn of the staff’; and *Allt nan Sliseag* ‘burn of the slices’, a reference perhaps to a legend of Fionn mac Cumhail (see discussion in the section on Legends and the Supernatural below). Waterfalls are indicated by the names *Spùt Ban* ‘white spout’ and *Spùt Leacach* ‘flagstone waterfall’, specifying the geology here. *Steall Buidhe* ‘yellow spout’ is in Stank Glen. *Sruth Geal* ‘white torrent’ flows from near *Uamh Mòr* in the uplands of Kilmadock parish to near Dalvey where it reaches the Keltie Water. This watercourse marks the boundary between the parishes of Callander and Kilmadock. *Allt an Dubh Shruith* ‘burn of the black torrent’ flows just below *Creag an Fhithich* ‘crag of the raven’ which marks the boundary between Callander and Balquhidder parishes. In Port of Menteith parish is *Tiobart an Reil* ‘the well of the star’ and although not the name of an event, it has become associated with a battle between the Grahams of Menteith and the Stewarts of Appin shortly after the Battle of Pinkie in 1547; the name itself relates to a legend where if someone went to the well on a particular night when a certain star was shining on the well, that person would able to understand the speech of every creature in the world (see NSA x, 1103; Newton 1999, 158-161).
Climate, season, sound and time

The climate in the CLP area is probably best described as variable, but by being among some of the highest areas in Britain, it must also have been among the coldest and wettest of places. Knowing when to grow crops and perhaps places in which to avoid certain activities at times of inclement weather – such as low ground when it floods – would have been essential, other names may have signalled the beginning of planting and other activities during spring and summer. Names in this category are few in this area, but on the northern slopes of Ben Ledi are Coire na Fuaire ‘corrie of the cold’ and Creag Coire na Fuaire ‘Crag of Coire na Fuaire’, suggesting that the area did not receive much sunshine, especially in the winter months. Place-names containing Gaelic dubh ‘black, dark’ may also indicate areas that do not receive much light, although some of these may have been named in comparison to paler areas. One place that did catch the sun was Greenock, now Braes of Greenock, a settlement about 3 km due south of Callander. Deriving from G grianag ‘sunny knoll’, the settlement lies on a south-facing slope. Wind is often a problem in Scotland and Bealach Gaoithe, on the hills above the Falls of Leny, means ‘windy pass’; the bealach probably makes a perfect funnel for the north winds flowing over Loch Lubaig.

Landcover and ecology – flora and fauna

Place-names are a great indicator of past plant and animal life, indeed without them it is possible we would probably not know of the distribution of certain species. Leny in Gaelic is Lánaidh meaning a ‘damp meadow; swampy plain’. The area around the old church of Leny is frequently flooded in winter. At the eastern end of Callander, on the banks of the River Teith, is Lagrannoch for lagraineach ‘ferny or bracken hollow’. Some settlement-names contain the names of plants and trees – A’ Chrannach seems to mean ‘tree place’, although which type is unknown – there are no trees shown on earlier maps, but there may be the memory of trees here in times past. Coinean na Craoibhe ‘small hillock or mound of the tree’ is in the grounds of Leny House. More specific is Chaoruinnach (modern Caorannach) a settlement shown on the OS 1st edn OS map near Stank; the name means ‘mountain ash/rowan tree place’ and is shown as Kerynagh in 1451 (ER v, 476). Nearby is Coire Carnach ‘corrie of Chaoruinnach’ meaning it was on the lands belonging to the settlement. Tombea was a settlement and mill just south of St Bride’s Chapel whose remains have probably been obliterated by the predecessor of the A84 road; flowing into the Garbh Uisge nearby is Allt an Tuim Bhice ‘burn of the birch hill’ – Tombea, on record from at least 1636 (Dumb. Tests., 106 with a certain Finlay M’Kinlay resident) is the Anglicised version of G Tom Bheithe. In the hills above Leny is Creag Bheithe ‘birch crag’. Two names show extended woodlands – Coillhallan Wood, to the south of Callander, seems to contain G coille ‘woodland’ with a name Calen, which is frequently found alongside Callander in early documents from 1451. It is not properly understood what Calen represents but could be the personal name Cailean, a name most notably found among the Campbells. Coille a’ Bhròin ‘wood of sorrow, lamenting’ on the northern shore of Loch Venachar, will be more fully discussed under the heading of legends below.

While wild animals are not found much among the settlement-names, Coillechat ‘cat wood’ is one, and while we often assume these names relate to wildcats, they may instead refer to domesticated cats. Another name containing cat is Sgairneach a’ Chait ‘large stony heap of the cat’, near Ardandavie Hill. Brackland/Bracklinn has nothing to do with a speckled pool, but rather the earliest forms (Brathul 1261, Brouculy 1267, and Broculli 1330) possibly point to it being for broc thulaich ‘badger hillock’. Near Leny is Tuim Bhroc ‘badger hill’; one of the small burns immediately west of Tuim Bhroc, may originally have been called Allt an Tuim Bhro(i)c and this has influenced the name of the hill. Most, but not all, names associated with wild animals in the CLP area are of deer or birds. Anie is for Àth an Fheidh ‘ford of the deer and the Gaelic version of the name is found in Tom Àth an Fheidh’. The above mentioned
Ardnandave is Àird nan Damh ‘height of the stags’. Creag an t-sionnaich ‘crag of the fox’ is near Stank. On the opposite side of the Garbh Uisge is Creag nan Gabhar ‘crag of the goats’, while Meall nan Gabhar ‘lumpy hill of the goats’ is a hill above Arduchullarie More. Two identical names almost facing each other across Loch Lubnaig are Bealach nan Searrach ‘pass of the colts’. These names remind us of the importance of horses in earlier societies, and perhaps should come under the category agriculture. However, we know from other areas, such as Badenoch, that semi-wild herds roamed there in the 18th century (Taylor 2016, 67). Birds are common in Gaelic place-names and there are at least five in the CLP area. Coire nan Eun ‘corrie of the birds’ sits above the Falls of Leny. In some Gaelic dialects, such as Arran, eun can be a word for eagle (Fraser 1999, 157). The more usual word for eagle in Gaelic is iolair and this can be seen in Creag na h-Iolaire ‘crag of the eagle’, a crag at the head of Stank Glen. On the western edge of the CLP area, overlooking Glen Finglas is Sgòrr an Fhitich ‘rocky peak of the raven’. Three km to the north is Bioran na Circe ‘point of the hen’, while waterfowl could be found at Bealach nan Lachan ‘pass of the wild ducks’.

Agriculture – crops, domestic and farm animals

Agriculture was the mainstay of life in the middle ages and beyond, as indeed it had been for many centuries before that. Humans have been living in the CLP area for at least six millennia as evidenced by the Neolithic settlement at Claish (see Barclay, Brophy, and MacGregor 2002), and many generations worth of knowledge of recognising the best places where to plant crops, milk and graze cows, collect peat, where to practice transhumance, and a myriad of other concerns had gone into enabling survival in this harsh environment. Usually in an upland area, the majority of place-names that come under the category ‘agricultural’ are of a pastoral nature; that is not quite the case with the CLP area, perhaps because the area is very craggy. We know that the hills to the north of Callander were grazing lands for the barony of Callander in 1775, nevertheless the lack of names of a pastoral nature is quite striking. Unlike in the Lowlands, grazing for sheep is not much attested in the place-names of the CLP area (although Creag na h-Olla ‘crag of the wool’ is one), probably because large scale sheep farming had only become established as recently as the 1770s, when the number of sheep in the parish increased from 1,000 to 18,000 (OSA xii, 161); most of the agricultural place-names then are of a pre-clearance nature. Some of the settlement-names contain agricultural elements, and indeed, elements such as baile found in Balvalachlan, Balgibbon, and Balmeanoch, are themselves indicative of arable farming. Auchleshie and Auchenlaich both contain Gaelic achadh ‘field’, and later became the sites of permanent settlement, perhaps with population expansion. Temporary settlements in the form of shielings could be found at Arivurichardich in Gaelic Àirigh Mhòr a’ Cheàrdraich ‘the big shieling of the smithy’. Àirigh is the usual Gaelic word for shieling in southern Perthshire; its meaning is uncertain, but it seems to have to do with the activities that went on at shielings (Bil 1992, 388-9). Another shieling can be found at Airigh Coire a’ Molach; near it is Bealach na h-Imrich ‘pass of the flitting’ where the women and children and the animals of their would move to the shielings in the summer months while the crops ripened. One place-name may contain a crop – Coilantogle seems to be Cùil an t-Seagail ‘nook of the rye’.

Other settlements, initially of a temporary nature, were established near water-meadows or haughlands. These are level areas beside the river, which are prone to flooding and so enriched by nutrients making them suitable for grazing or growing hay for winter feed. However, in some places their fertility ensured that they became permanent settlements, or at least gave their names to permanent settlements nearby, and usually contain the element dail, a borrowing from Pictish dol. These can be found at Dalvey, Dalvorich, and Dail an Dubh Shruith On the assumption that many of these places produced crops of some kind, they would have needed a
mill to process that grain. We know, for instance, from documentation that there was a mill at Milton, earlier Ballynmolyn in 1451, but otherwise mill place-names are rare in the CLP area. Mills were an important source of baronial income and were often resented by the local populace because they were thrilled to them, i.e. they had to take their grain to the laird’s mill or pay some form of punishment or fine and this ‘imposition gave the baron courts one of their main tasks’ (Smout 1969, 120). Gaelic gart is ‘an enclosed field or settlement’, often won out of what medieval people called waste or unproductive land for arable agriculture (McNiven 2007). There is a place called Gart on the eastern edge of the modern town of Callander, Gartchonzie possibly containing G còinneach ‘mossy, foggage’ is on the western edge, while a lost gart-name Gartochoosh was near the golf course to the north of the town. Gartenjore, a lost settlement above Portnellan is discussed in Church and chapel below.

Buildings and settlement

There is one of two Gaelic habitation elements to be found in the study area: baile ‘landholding, farm-town’ and taigh ‘house’, which is found in Tynaspirit and discussed in Legends below. Baile in much of the Lowlands can most likely be dated to a fairly short time-frame, perhaps in the 12th and 13th centuries (see PNF 5, 226 for dating of baile-names in Fife). However, in an area where Gaelic was spoken over a much longer time-frame, as in the CLP area and the Highlands in general, we may be looking at baile being use until fairly recently, for example I can only find Balmeanoch, now found only in Balmeanoch Woods near Leny House, as Bellimannoch in 1675 (Dumb. Tests., 21). This name is the equivalent of Scots Middleton, and was the middle-town of an existing place, namely Leny. There are two other places in Menteith containing baile meadhanach – one near Buchlyvie KPN, and the other near Rusky PMH. These seem to be late formations of baile names despite them all being in the lowland parts of Menteith, and are perhaps indications of a vibrant Gaelic language still being spoken in the later Middle Ages at a time when we might have expected Scots to have taken over. The earliest baile-name is now, and quickly became, a town-name: Milton of Callander, situated almost halfway along the northern shorth of Loch Venachar, is on record as Ballynmolyn in 1451 (ER v, 476) – it is Myltoune from 1461 (ER vii, 51) and thereafter, but Milton Glen Burn is still called Allt Gleann Baile Mhuilinn in 1866 (OS 6 inch 1st edn), suggesting that this is what it was called by the local Gaelic speakers at that time. There are four baile-names in total in the area, but the other three contain, or seem to contain, personal names and will be discussed below under the section people and occupations.

Church and chapel

It has long been recognised by historians and archaeologists that place-names are an important resource for studying many aspects of the medieval church in Scotland. Place-names can shed light on a wide variety of topics that fall under the category of religion. It is often unclear how the medieval Church interacted with the laity and the land at parish level and place-names are one way of helping us understand more about that interaction, indeed, if it was not for place-names our understanding of Christianity in Scotland would be so much poorer. We do not know when Christianity reached Menteith, but the dedications of the local churches and chapels suggest it was relatively early. A word of warning! Place-names containing the names of saints can be notoriously difficult and complicated, even for experienced place-name scholars. Many place-names with saints’ names attached comprise G mo ‘my’, an ‘element that occurs regularly in affectionate or devout forms of names for saints, known as ‘hypocorisms’ or ‘hypocoristic forms’. It causes lenition of the first letter of the following part of the name, which is often a shortened version of the saint’s real name. This can make some saints’ names very hard to recognise, though some remain fairly transparent. More information details in relation to the medieval church in Menteith, including the CLP area, can be found in my article.
in the *Journal of Scottish Name Studies* (McNiven 2014); the section below is a summary of this. The church at Callander was dedicated to St Kessog and the mound on the northern side of the River Teith near the bridge is called *Tom ma Chisaig* ‘St Kessog’s hillock’. Kessog is especially associated with Luss, where he was supposedly martyred and buried, and there are places in nearby Glen Finglas dedicated to him – Glen Casaig and *Cladh nan Casan* ‘burial ground of Kessog’s people’. Leny Kirk was dedicated to Fillan, however, there are no place-names specific to him in the area. Kilmahog is one of two *kil*-names in Mentieth (the other is Kilmadock). *Kil-* is derived from Gaelic *cill* ‘cell, church’. The second element is more difficult, but the saint’s name could be Cuaca, a saint from Meath in Ireland, or perhaps Machutus, a British saint whose name is found in Lesmahagow in Lanarkshire. A further Gaelic saint, Brigit (Bridget) of Kildare in Ireland, is found in St Bride’s Chapel at the southern end of Loch Lubaig, although the name itself is not Gaelic. This small graveyard was found to have two stone cross slabs during excavations in the 20th Century; they have been dated to the 11th and 13th Centuries. Near here are two place-names indicating the chapel – *Àth a’ Chaibeil* ‘ford of the chapel’ and *Creag a’ Chaibeil* ‘crag of the chapel’. Three officials of the medieval kirk can be found in place-names – *Achadh an Easbuig* ‘field of the bishop’ on the hill above the Pass of Leny, might be a field that provided payment to the bishop of Dunblane. On the western side of Loch Lubaig is a hill called *Maol an t-Sagairt* ‘bare or bald hill of the priest’, although recent planting means the hill is not bald anymore! On the hillside above Loch Venachar stood the now lost settlement of *Gartenjore*. The name is Gaelic *Gart an Dèoraidd* ‘enclosed field or settlement of the relic-keeper’. A charter of 1572 tells us that ‘the lands of *Garrindewar* [were] founded for the ringing of a bell before dead people in the parish of Kilmahog in the time of papistry’ (*RMS* iii, no 2092; see also Márkus 2009, 125, 139–40). A further lost place-name tells us about the lands that belonged to the local priest; in 1562 a document tells us of the barony of Callander including ‘the tua Iberts’ (*Assumptions*, 348). Deriving from Old Gaelic *idbart* or *idpart*, and so Gaelic *ìobairt* ‘offering, sacrifice’, but not a druidical sacrifice as can sometimes be seen in older literature, rather it is a sacrifice of land by a landowner to the kirk. The Iberts whereabouts are now unknown, but there is a house on the southern side of Callander called the Old Manse, and next to it is Churchfields (NN629075). There are not many place-names from the later Protestant kirk in Scotland, but one might be *Tom an Fhacail* ‘hillock of the word’ above Leny House, and this may be where preaching was heard either just before the Reformation of 1560 by Protestant ministers, or possibly by Covenanting ministers after the restoration of the Crown in 1660. Another possibility is that this is where preaching took place after the Disruption of 1843 when the Free Church of Scotland broke away from the established Kirk. *Coire an Fhaidhe*, on the eastern face of Ben Ledi seems to mean ‘corrie of the prophet or seer’, but whether this relates to Christian or pagan belief is not clear.

Archaeology and cultural artefacts

Place-names can inform researchers a great deal about archaeology. However, before going into what they can tell us, we need to be aware that there are basically two types of archaeological place-names (Taylor 2003, 50): one refers to those features that were built at the time of naming, for example *Bothan na Plaighe* ‘bothy of the plague’ on the hills above the Bracklinn Falls, which seems to have been a place specifically built to isolate plague victims. It is not known when it was built. The second category refers to features that were already part of the landscape when they were named – an example is Bochastle, form *G Both Chaisteil* ‘castle hut’ (although the early forms – *Montcastell* in 1451; *Mochastir* in 1452; it is not until the mid-17th century that *Bochassill* appears – suggest the first element is *G moine* ‘bog’), and applying to the Roman fort on the flat plain near where the *Garbh Uisge* and *Eas Gobhain* rivers meet. The Gaelic element *caisteal* is often applied to a fort (whether Iron Age, early
Medieval, or Roman) in low-lying areas, sometimes in contradistinction to G dùn, the usual element for a hill-fort (see McNiven 2013, 71-2 for a discussion of the Gaelic terms of hills-forts). There are two places containing the element dùn ‘fort’. Dunmore, dùn mòr ‘big fort’, sits 2.5 km west of Callander, the steep eastern face overlooks the remains of the Roman fort at Bochastle. Dunmore is an excellent example of an indigenous fort with four embankments encircling three sides of the fort to the north, west and south; the name as we have it is Gaelic, but it may have had an earlier Brittonic/Pictish name such as *Din Mor (Dîn Mawr in modern Welsh).6 Near the foot of the fort sat the now lost place-name Tarandoun, probably for Gaelic Tòrr an Dùin ‘conical hill of the fort’. At the eastern end of Callander is the farm of Auchleshie, which might be for Achadh na Lise ‘field of the fortified place’. If lios is the specific (lise is the genitive of lios), then it may refer to the fort lying 500 metres to the west-north-west on a 132 metre hill overlooking the farm of Auchenlaich.

People, occupations and industry

There are several place-names in the CLP area that contain personal-names or professions. Smiths could be found, or are least have lands, at Arivurichardich in Gaelic Àirigh Mhòr a’ Cheàrdaich ‘the big shieling of the smithy’ and the area seems to have been part of the grazing lands of the barony of Callander; at Coire na Ceàrdaich ‘cairn of the smithy’ on the high ground near Beinn Each ‘horse mountain’; Eas Gohainn is ‘smith cascade’, but this may be a name that more properly come under the Legends and the supernatural below. Other industrial place-names include Bealach nan Sgliat ‘pass of the slates’, north-west of Anie, and Creag nan Sgliat ‘crag of the slates’ near Coireachrombie remind us that mining for slates took place on the HBF and Coire na Meine ‘corrie of the mine’ may also have been a place where such activity took place on Ben Ledi. We know that slate form nearby Aberfoyle went to furnish the roofs of the castles at Stirling and Doune (AMW ii, 168; NRS GD220/6/1808). Often place-names contain surnames – Balvalachlan, south of Callander, is the baile or farmstead of someone called MacLachlan or MacLauchlan. The earliest spelling of the name is from 1662 (Balclaichling, Retours PER no. 708), and John MacLauchlan lived on the farm in 1775 (NRS E777/313/2). The genitive singular of G mac ‘son’ is mhic, which comes through in the current spelling of the name as ‘v’. Balgibbon on the western edge of Callnder may contain the personal-name Gibbon which is a diminutive of Gibb, i.e. Little or Wee Gibb; Gibb itself is a pet-name of Gilbert. We don’t know who Gibbon was but the name occurs in medieval documents in Perthshire (see survey below for details). Alternatively, the -gibbon element may simply be G gibean, gen. gibein ‘hunch on the back [shaped rise]’. Balvorist on the Braes of Doune is probably for the baile or farmstead (or possibly bealach ‘a pass’) of someone called Maurice or Muiredhach, which occurs often in Menteith. A Donald M’Vorest (no date) and a Mary M’Vorest (1733) are mentioned in the Dunblane Testaments residing in Callander and Brig o’ Turk respectively (Dunb. Tests. 112). A burn which flows into the Brackland Burn near West Bracklinn is called Eas Uilleam ‘William’s waterfall’ but it is not known who the eponymous William was.

Events, administration, justice, and hunting

Events are very rare in CLP place-names, but one notorious place-name is Lochan nan Corp ‘small loch of the bodies’ on a saddle between Ben Ledi and Bioran nan Circe. This is supposed to have been a place where a party of people met their deaths as the travelled from Glen Finglas to St Bride’s Chapel and fell into the ice-covered lochan. The event gave rise to the nearby place-name Bealach nan Corp ‘pass of the bodies’. A name like Meall nan Saighdear ‘lumpy hill of the soldiers’ suggests that the area was caught up in the Jacobite Rebellions and the

6 My thanks to Guto Rhys for this information.
The name probably relates to a watch place manned by soldiers, i.e. Redcoats of the British Army, and indeed much of the area was run by the Annexed Estate Commission until it was disbanded in 1784. The authority of the local lords was needed for the landscape to be organised for humans to live in and the administration of that landscape can also be expressed in place-names. Boundaries were important and medieval people often went to great lengths to mark and justify these boundaries. There are some names in Menteith in general containing G crìoch ‘boundary’, including Allt na Criche in the hills above Callander; this means ‘burn of the boundary’ and marked the boundary between the estate of Leny and the barony of Callander. It was probably also the boundary between the parishes of Leny and Callander in the Middle Ages. Hunting was a favourite sport of the upper echelons of society in Menteith, and Coire nan Saighead ‘corrie of the arrows’ may have been a deer trap where the nobles dispatched their prey which had been driven towards them. On the opposite side of Loch Lubnaig from Coire nan Saghead is Creag na Comh-sheilg ‘crag of the joint hunting’ on the boundary between the parishes of Callander and Balquhidder (and between the earldoms of Menteith and Strathearn). Some of the hills which are named after deer, such as Ardnandave, in Gaelic Àird nan Damh ‘height of the stags’, on the high ground between Loch Lubnaig and Glen Finglas, the latter being a favourite hunting ground of the Scots royalty before the Union of Crowns in 1603, and while not strictly hunting-names, they may have been named to indicate a place where deer congregated. A place where people met was Tom a’ Mhoid ‘hill of assembly’ on the slopes above the eastern side of Loch Lubnaig. In many places, such as near Port-of-Menteith where there is Tamavoid, this name can mean a ‘court-hill’, where local disputes between the people who worked the land could be resolved. Tom a’ Mhoid on Loch Lubnaig-side, however, may simply have been a place where hunters met to chase deer on the estate of the Stirlings of Keir (near Dunblane), who owned this area in the Middle Ages.

Legend and the supernatural

Non-Christian belief was also important to the Gaels. We might wonder how many legendary place-names have been lost due to clearance in the 18th century and before the Ordnance Survey were active in the area, but generally in areas where Gaelic prevailed for longer many more such names survive. Chaoruinnach, a settlement that stood near Stank, contains G caorainn ‘rowan tree’, which are often found in legends and myths in Gaelic tales, particularly those of Fionn Mac Cumhaill and Cúculainn, the legendary Irish heroes whose exploits were also celebrated among the Gaels of Scotland. The rowan tree was believed to ward off evil spirits. The exploits of Fionn Mac Cumhaill are found in a small number of place-names in the CLP area. For many Highlanders Fionn mac Cumhaill and his band of warriors were popular role models and heroes of Gaelic culture, and for some Gaels Fionn was even an ancestor (Newton 2009, 2). The Fian were seen as protectors of Gaeldom from invaders such as the Vikings, but the Fenian ballads also provided inspirational tales for young Gaelic warriors to aspire to (Newton 2009, 175). Fionn mac Cumhaill was held to be ruler over all rulers, a mighty horseman, a leader of battles, but he is also generous to the ordinary folk (Newton 2009, 327). Gaels considered the place-names in the Highlands dedicated to Fionn as ‘suitable evidence for the historicity of the Fian’ (Newton 2009, 227). Two place-names seem to relate to Fionn mac Cumhaill are Ben Gullipen and Allt nan Sliseag. There are at least six other hills in Scotland with Gullipen (or a variant) in its name, the most famous being Ben Gulabin in Glenshee in eastern Perthshire. Here exploits of Fionn and his Fenian band have been commemorated in landscape of the area (McNiven 2014). Ben Gullipen is where Fionn’s friend and wife’s lover, Diarmaid, died after standing on the poisoned hair of a boar. The name

---

7 A Jacobite backsword recovered from the ‘River Leny’ is held at the National Trust for Scotland’s Culloden centre, but it is not clear if it dates from after the battle of Sheriffmuir in 1715 or possibly the Battle of Falkirk in 1746. My thanks to Dr Ross Crawford for this information.
is meant to mean ‘snouty mountain’ due to its resemblance to a pig’s nose (Meek 1998, 153-8). *Allt nan Sliseag* is ‘burn of the shavings’ and may relate to a tale where Diarmad was making a living by carving wooden bowls when Fionn discovered him and called him in with the *faghaid* (the hunting cry of the Fianna). At this point, he convinces Diarmad to hunt the boar during which he dies. Ben Gullipen, the site of the hunt, is just across from *Allt nan Sliseag*. The Gulabin names are always connected with a second toponym that fits with the legend, usually a torc or muc name (and there is a Dùn nam Muc from memory near Callander). *Allt nan Sliseag* fits with this being a ‘node’ for the story (Roddy MacLean pers. comm.; see also Campbell 1862, 39-49). 8 *Allt nan Sliseag* falls into the Garbh Uisge at Linne Lag na Caillich ‘pool of the hollow of the old woman’. 9 Midway along the northern shore of Loch Venachar is Coille a’ Bhròin ‘wood of lamenting’. The story behind the name is that a kelpie or water-horse (in Gaelic *Each Uisge*) carried off fifteen local children who were playing in the water at Easter (Westwood and Kingshill 2011, 91, 364, quoting Leyden 1800, 13). There are some names that contain *G cailleach* ‘hag, old woman’, including Eas na Caillich ‘waterfall of the Cailleach’ on the hills above Callander, and Linn Lag na Caillich ‘pool of the hollow of the Cailleach’ near Kilmahog. Pete Drummond speculates that some *cailleach* place-names might commemorate Cailleach Bheur, a legendary figure who wandered the hills calling the deer hinds to her with her siren voice so she could milk them (Drummond 2007, 188). The Cailleach could often be associated with the stories of Finn mac Cumhaill in Scottish Gaelic folklore and it may be significant that *Allt nan Sliseag* flows into Linn Lag na Caillich. 10 A more modern legend perhaps is Tom na h-Ulaidhe, on the eastern side of Loch Lubnaig is ‘hillock of the treasure’, unfortunately the OS Name Book is lost for this area, but in the parish of Moy and Dalarossie in Inverness-shire there is a similarly named hill and ‘it was believed to contain treasure placed there by parties when on their way to the field of Culloden and from this circumstance takes its name. It means the Hillock of the Treasure’ (OS1/17/5/50). Might the Loch Lubnaig hillock have been named for the same reason? Tighnaspirit, on the road between Callander and Doune is often held to be a place where alcohol was distilled, but nearby is a Scots name – Bogle Burn. A *bogle* seems to have been a mischievous ghost. Could the two places be connected, even in different languages? The highest points on the Braes of Doune are Uamh Mhòr and Uamh Bheag ‘big cave and little cave’. There is a legend associated with a giant (see Newton 1999, 82-7) which relates also to the gift of the lands of Brackland. Walter Scott mentions this giant too and also has the cave as a den for rustlers in footnotes in *Lady of the Lake* (Scott 1810, 294).

**Routeways**

In order to go into and through the CLP area and beyond there must have been routeways, and a small number of place-names refer to these. There are at least ten place-names containing the Gaelic element *bealach* ‘pass’ – including Bealach na h-Imrich ‘pass of the flitting’, indicating the movement of milk-cows and women and young people at ‘the big flitting’ to the shieling grounds once the men had prepared them for use and habitation; the men returned to the settlement to harvest the crops (Fenton 1980, 101; Fenton 1999, 135). Ballochallan is an Anglicised name - Bealach Àilein ‘meadow pass’, from Gaelic àilean meaning ‘green, plain, meadow’. This place sits on a flat plain about three km to the south east of Callander, and just 300 metres west of the place-name Straid, Gaelic sràid, meaning ‘street, road’. Straid is about five km from the Roman fort at Bochastle and eight km from the Roman fort at Doune, and so

---

8 My thanks to Dr Ross Crawford for this reference.

9 *G cailleach* can mean ‘hag, old woman’, and also ‘nun’. However, the latter meaning should only be considered where there is evidence of a nunnery or other such institution of female religious orders.

10 One of our volunteers, Ross Wood, has looked into the Cailleach in much more detail than this and it is hoped something more substantial may arise from his fantastic work.
may indicate a Roman road or other paved road (c.f. Barrow (1992, 210) where he writes of Old English *street* as being a possible indicator of Roman roads). More modern is *Drochaidein Bàin* ‘small white bridge’, part of a network of bridge built on roads constructed by General Wade around 1730. Not all rivers and burns were crossed by bridges – Anie is in Gaelic *Àth an Fheidh* ‘ford of the deer’ and is also on the original route of Wade’s road as it crossed the Anie Burn. More precarious crossings are to be found in the Garbh Uisge as it exits Loch Lubnaig – *Àth a’ Choire* ‘ford of the corrie’, near Stank, and *Àth a’ Chaibeil* ‘ford of the chapel’ near St Bride’s Chapel.

**Colours**

Many place-names contain colours and texture in their names and the CLP area is no exception. Gaelic has a wider range of colours that English or Scots – think of the numerous Green Hills in Britain or even the Blue Ridge Mountains of Virginia; Gaelic is more nuanced and may relate to the geology or the vegetation of a feature. *Glas* and *uaine* both mean ‘green’, but *glas* is a more grey-green; *uaine* more a vivid green. In some places, however, *glas* was applied to ‘unripe corn or he new shoots of grass in spring’ (Murray 2014, 197). There are six colours represented in the place-names of the CLP area – Ardhchullarie (*Àird Chùil Odhair* in Gaelic), *Meall Odhar*, and *Stùc Odhar* contain *G odhar* ‘dun coloured, sallow’. *Cnoc Dubh*, *Tom Dubh*, and *Stùc Dubh* are all ‘black or dark’ hills; *Meall Liath* is ‘grey lump’; *Creag Gorm* is ‘blue crag’, while Drumbane is in Gaelic *druim bàn* ‘white ridge’ and *Sruth Geal* is ‘white current or burn’. The most common colour is *G buidhe* ‘yellow’ and is found in *Coire Buidhe* ‘yellow corrie’ and *Creag a’ Choire Bhuide* ‘rock of Coire Buidhe’, *Mullach Buidhe* ‘yellow summit’ and *Steall Buidhe* ‘yellow spout’.

**Conclusion**

Researchers into medieval and later rural society in Scotland have long stated that place-names have the potential to inform us of aspects of rural society that cannot be uncovered by documentary research or archaeology alone. It has been found that it is often difficult for these researchers to match up the documentary and archaeological evidence. While a place might often be found in the historical record in the medieval period, it is usually only the last phase before abandonment that is uncovered archaeologically, perhaps as late as the nineteenth century in many cases. As such many researchers cite place-names as one potential answer to how we might discover more about rural society in the past. In Scotland place-name research into rural society is hampered by the lack of quality surveys both at a county and national level. However, even small surveys such as this should help meet the needs of historians and archaeologists hoping to understand more about how place-names can help them uncover various aspects of historic rural Scotland. Much more research is needed into the place-names of Scotland, but hopefully it can be seen that place-names have a great deal to offer in helping us understand past landscapes and languages.
Survey of the Gaelic Place-names of Callander’s Landscape

ACHADH AN EASBUIG  CLD, LXY R NN599092 1 150m SEF
Achadh an Easbuig 1866 OS 6 inch 1st edn PER & CLA

G achadh + G an + G easbaig
Achadh an Easbaig ‘field of the bishop’. The earliest reference is from 1866, but the name may date to at least 1237 when Pope Gregory assigned to the bishop of Dunblane ‘if it can be done without grave scandal, a quarter of the [teinds] of all the parish churches of the Diocese of Dunblane’ (Theiner 1864, no. XC; Cockburn 1959, 50). An alternative might be that it was lands belonging to Giolla Espuig Mór of Leny mentioned in a charter of Alexander II to Alan and Margaret of Leny in 1237 (Leny Charter Alexander II). See also Church and chapel above.

A’ CHIOCH  CLD R NN578089 1 390m
A’ Chioch 1866 OS 6 inch 1st edn PER & CLA

G an + G cioch
‘The Breast’. Gaelic often uses the human body as a metaphor for landscape features, but they are rare in the CLP area.

A’ CHRANNACH  CLD R NN644095 1 348m
Cruinneach 1866 OS 6 inch 1st edn PER & CLA
A’ Chrannach 1901 OS 6 inch 2nd edn PER & CLA

G an + G crann + G –ach
‘The tree place’ or ‘the plough place’. G crann can mean ‘plough’ or ‘tree’ according to Dwelly. The area is now planted with modern forestry, however, there is no sign of trees on the the 1st or 2nd edn OS maps, although the name may contain a memory of this neighbourhood containing trees. Alternatively, the area may have been a tract of arable land on the hills above Callander. Three km to the north-north-west is Tom an Eòrna ‘hill of the barley’ showing that there was probably a spot of arable land nearby.

The earliest spelling is G Cruinneach, meaning ‘dew, mist, fog’.

*Up' Anie* 1783 Stobie
*Aney* 1791-99 *OSA* xi, 581, 586, 612 [‘Aney, à-n-eih, the ford of the deer’]
*Aney* 1837 *NSA* x, 352 [‘There are also slate-quarries wrought in the parish; one on the farm of Aney, the property of Mr Stirling of Keir’]
*Anie* 1866 OS 6 inch 1st edn PER & CLA

G àth + G an + G fiadh
Áth an Fhèidh ‘ford of the deer’. Fèidh is the genitive sg. form of fiadh ‘deer’. Angus Watson suggests that Anie may derive from annaid ‘(old) church, mother church’ (Watson 2002a, 47). While the site of St Brides Chapel could be seen to lend support for that view, the place-name *Tom Áth an Fhèidh* 700 m north (NN588109) makes it more likely that we are looking at ‘ford of the deer’ rather than ‘mother church’, and this interpretation is corroborated by the modern pronunciation of the name, with stress on the final syllable. *Tom Áth an Fhèidh* seems to mark the boundary of the lands of Anie. *Upr Anie* is marked on Stobie, presumably this is the site of the present Anie; *Lower Anie* is marked nearer to St Bride’s Chapel. The ford crossed the Anie Burn at NN588100, just to the south-west of the present farm, and was on the Old Military Road marked on the 1:25,000 Explorer map. See also *Landcover and ecology* and *Routeways* above.
The name is spelled *ànàidh or *àthanaisd in Watson’s notes (Coll-97/CWP/69).

/aˈni/

**ARDCHULLARIE MORE**  CLD S NN581135  1 123m SWF

*Ard-chullerie* 1806 Graham, *Sketches*, 7

*Ardchullerie* 1812 Graham, *Sketches*, 21

*Ardchullarie More* 1866 OS 6 inch 1st edn PER & CLA

G àird + G cúil + G odhar

Àird Chùil Odhair ‘promontory of the dun-coloured nook’. Angus Watson (2002, 30) has ‘G àird ‘point, promontory’ as the first element; the contours form a modest promontory at the site of the present dwelling. The two earliest forms suggest *chùil odhair* ‘(of) dun-coloured nook’ for the remainder, perhaps as an e.n.’ (see also Watson’s discussion on *cùil*, (Watson 2002, 453-4), where he has ‘cùil G f ‘corner, nook’). The lands of *Ardchullarie* were split in two at some point, but this may have been a reflection of the natural situation in any case, for the Ardchullarie Burn runs through the middle of the territory leaving Ardchullarie More on the southern side of the burn Archchullarie Beg11 was on the northern side. More than that however, Ardchullarie More was in Menteith, while Ardchullarie Beg was in Strathearn because the Ardchullarie Burn was the boundary between CLD and BQR. The form found in Roy refers presumably to *allt chùil odhair* ‘stream of the dun-coloured nook’ or *allt chùl àraigh* ‘stream of the back shieling’, although the latter may be a later reinterpretation. The Roy form could suggest we are dealing with an existing name *Cullarie: so we may have ‘promontory of *Cullarie* and ‘burn of *Cullarie’. See discussion in Colours above.

The name is spelled *Ard-chuilieirigh* in Watson’s notes (Coll-97/CWP/69).

/ˌardˈhulərˈ mor/12

**ARDNACREGGAN**  CLD S NN621084  1 140m SWF

*Ardnacreggan* 1901 OS 6 inch 2nd edn PER & CLA

G àird + G an + G creagan

This is a modern settlement, but it is not clear if the name is modern too, as it first appears on the OS 6 inch 2nd edn map.

**ARDNANDAVE HILL**  CLD R NN567125  1 715m

*Ardnandave Hill* 1901 OS 6 inch 1st edn PER & CLA

en Ardnandave + SSE hill

11 Now lost, but marked ‘Ruins of’ on 1st edn. 6 inch OS map, sheet.
12 My thanks to Lindsey Tindall of Strathyre for this information. Mrs Tindall informs me that this is the usual Strathyre pronunciation of Ardchullarie. Strathyre BQR is 4 km north-west of Ardchullarie More.
Ardnandave can be analysed as G àird + G an + G damh giving Àird nan Damh ‘Height of the stags’.

The name is spelled Ard nan Damh in Watson’s notes (Coll-97/CWP/70).

**ARIVURICHARDICH**  CLD S NN642137 1 326m SWF

*Arivouricherdich* 1775 NRS E777/313/2

*Arivurichardich* 1783 Stobie

*Ari-vuri-cheardich* 1791-99 OSA xi, 615

*Arivurichardich* 1866 OS 6 inch 1st edn PER & CLA

G àirigh + G mòr +G an + G ceàrdach

Àirigh Mhòr a’ Cheàrdaich ‘The big shieling of the smithy’. G cèardach ‘smithy’ is fem., but the early forms suggest it is being treated as masc., i.e. a’ Cheàrdaich rather than na Ceàrdaich. The middle i (between vur and chardich) may represent the definite article. This was part of the uplands of the barony of Callander, and seems to have been part of the grazing lands of the barony. See also discussion in *Agriculture* above.

/ˈarɪvʊrɪˈardɪx/

G achadh + G an + ? G laogh
Achadh an Laoigh or nan Laogh ‘field of the calf or calves’? The earliest form looks like it contains a transcription error v for l. The specific seems to have been assimilated to Sc laich ‘low-lying ground’. However, a place called Achloa in Glenlyon, 3 km north east of Fortingall, might offer another possibility; it is mentioned by Watson as being Achadh Laogh ‘calves’ field’; early forms include Achleys and Auchinleys (Watson 2002 [1930], 196). See also discussion in Agriculture above.

The name is spelled Ach an lámhaich in Watson’s notes (Coll-97/CWP/69).

G achadh + G an + ? G lios

Achadh na Lise? ‘field of the fortified place’? If lios is the specific, then it may refer to the fort lying 500 m to the west-north-west. The ending could be from gen. sg. liosa. However, we wouldn’t expect the palatal s to develop. It might have developed an alternative gen. containing palatalisation, Cox in Brìgh nam Facal gives both liosa and lise as gen. sg. (also both m. and fem.). For the frequently-occurring e in the specific cf Lesmahagow (Taylor 2009, 71-4), and Auchterless ABD (MacDonald 1987a, 40). See also discussion in Agriculture above.

/ɔxˈliʃ/ or /ɔxˈliʃ/
There are two other place-names with a similar name Ballinton KMA and Balanton AFE. It is likely that Balanton AFE is *Baile an Tòn* 'farm of the arse-shaped hill', but Ballinton KMA is situated in the midst of a large cluster of Sc *toun*-names and it may be that is a personal name Ballone plus Sc *toun*. see NAS GD430/61 (dating to 1532) which is a ‘charter by Robert, Commendator of Inchmahome and theconvent thereof in favour of Master Francis Ballone, priest of St Andrews diocese, of an annual pension of £20 Scots from teind sheaves of lands of Broich, Deanston and Cambuswallace, in parish of Kilmadock’. A ‘Dene Andrew Ballone’ was the ‘superior’ of Inchmahome prior to the Erskines becoming commendators in 1529 (Dilworth 1986, 64).

**BALGIBBON** CLD S NN640076 1 E 365 85m SEF

*Balgibbon* 1667 Dunb. Tests., 95 [John Roy M’Arthur in]

*Balgibbon of Callander* 1753 Dunb. Tests., 54 [Patrick Ferguson in]

*Balgibbon c.1755 NRS E729/2/23

*Balgibbon* 1775 NRS E777/313/105

*Balgibbon* 1866 OS 6 inch 1st edn PER & CLA

G *baile* + pn Gibbon

‘Tounship or farmstead of Gibbon’. The –*gibbon* element is probably the same as that in Arngibbon KPN. This was one of the farms that came to make up the present town of Callander in the eighteenth century (see CLD Introduction). Black (1946, 297) has Gibbon as a ‘diminutive for Gibb … + French diminutive suffix –on’; while he has Gibb as ‘a pet or diminutive form of Gilbert’. According to Black, Gibbon was ‘an especial favourite in Perthshire at an early date…’ (ibid). The name was not unknown in Perthshire; a Gibun de Munfichet¹³ witnessed a charter of Robert, earl of Strathearn in 1233 x 1235¹⁴ (*Lind. Cart.*, no. XXVII), while Gibun de Haya witnessed a charter of Alexander, abbot of Coupar Angus in 1220 (*Coupar Angus Chr*, no. XXVI). These two names may be based on the Old French name Giboin.¹⁵ It is tempting to see Arngibbon as the ‘portion of Gilbert (de Camera)’, who was prior of Inchmahome between 1450 and 1468x69 (Watt and Shead 2001, 109), but this is mere conjecture, as is wondering whether Balgibbon CLD belonged to him also. Another possibility is Gilbert of Glenkerny, i.e. the lordship of Glencarnie, Duthil parish MOR (Ross 2003, 161), who was given half the lands of Broculy or Bracklinn in 1267 (Fraser, *Menteith ii*, 217; see Bracklinn below); Bracklinn is 2.5km north-east of Balgibbon. It is notable that there were people with the surname MacGibbon in the area: John Macgibbon is mentioned at Gart in 1629 (*Dunb. Tests.*, 50) and Janet N’Gibbone of *Brae of Lennie* is mentioned in 1663 (*Dunb. Tests.*, 133).

Another possible meaning for the specific is G *gibein*, gen. *gibean* ‘hunch on the back [shaped rise]’. W.J. Watson has Balgibbon in Dwelly as *Bail’ a’ ghibein* (Dwelly 1902-12, 1006), and the name is spelled *Baile Ghibeain* in Watson’s notes (Coll-97/CWP/70). The name still survives the Callander street-name Balgibbon Drive and as the name of a hole on the golf course. See also discussion in *Buildings and settlement* above.

**BALVALACHLAN** CLD NN634060 1 66m

*Balclachling* 1662 Retours PER no. 708

---

¹³ Munfichet or Montfiquet is the original spelling of the Muschets of Kincardine in Menteith. The Montfiquets came to Scotland via Normandy around 1165 (Black 1946, 662); they were granted Kincardine in 1189 × 1195 (*RRS ii*, no 334).

¹⁴ The charter was also witnessed by Clement, bishop of Dunblane, who was elevated to that post in 1233, and G. (Gilbert), archdeacon of Dunblane, who was last heard of as being in that post on 7th May 1235.

¹⁵ My thanks to Dr Matthew Hammond for this suggestion.

G baile + pn MacLauchlan
Baile Mhic Lachlainn ‘farmstead of a person called MacLauchlan’. 16 Fourteen new farms or lots were proposed in the area to the south of Callander by the surveyors of the Annexed Estates, the body set up to improve the estates of those who had their lands forfeited after the ’45 Rebellion and to discourage further rebellion. The 1775 form comes from John Leslie’s plan and covers the proposed enclosure of Lot 9, 17 a 90 acre farm occupied by John Ferguson and John MacLauchlan. The Boglot entries are a bit puzzling, but may have been a name change perhaps after the last mentioned John or his heirs had died; the nearby lands of Greenock were marked on the Annexed Estate plan as Greenock Moss (NRS E777/313/2). With regard to the earliest forms, it is interesting that Black (1946, 533) shows spellings from the seventeenth century showing M’Clachlane or McClauchlan. The forms for c.1755, 1765 and 1775 show the genitive singular mhic, which comes through in the current spelling of the name as ‘v’. See also discussion in Buildings and settlement above.

In Watson’s notes Boglot is tentatively spelled am Bogladh (Coll-97/CWP/69).

17 The area between what is now the farm of Callandrade and Greenock Burn was divided into twelve lots by the surveyors for the Annexed Estates.
G baile + ?  
Two of the earliest forms (1471 and 1478) have Bellik- as the generic, which could suggest beadach 'pass' (the 1461 form has Bellit-; the t could be a scribal error for c). The specific could be the personal-name Maurice or Muiredhach, which occurs often in Menteith. A Donald M'Vorest (no date) and a Mary M'Vorest (1733) are mentioned in the Dunblane Testaments residing in Callander and Brig o’ Turk respectively (Dunb. Tests. 112). The early forms show an –ychl-ikl-ich ending, while later we have an –ist ending, which also occurs in an another Balvorist shown on Stobie southeast of Lake of Menteith between Cardross and Arnclerich PMH. See also discussion in Buildings and settlement above.

\[18 Information on pronunciation from Mr Campbell Millar [age 50+] of Ballachraggan, whose father always pronounced it that way. Mr Millar’s family have farmed at Ballachraggan for several generations.}
G baile + G an + G creagean
Baile nan Creagan ‘tounship of the crags’. The modern farm sits between two out-crops in a largely peat/heath landscape. Some of the earliest forms contain the definite article, and the specific-initial ‘g’ could represent nasalisation of c following genitive plural article. It is not clear, however, whether we can rule out bealach as the generic in some of these forms, perhaps as a generic substitution. There may also be variation with Baile a’ Chreagain ‘tounship of the little rock’. See also discussion in Buildings and settlement above.

‘Pass of the colts’. This Bealach nan Searrach is on the west side of Loch Lubnaig.

BEALACH NAN SEARRACH  CLD R NN598129 1 530m
Bealach nan Searrach 1866 OS 6 inch 1st edn PER & CLA

G bealach + G an + G searrach
‘Pass of the colts’. This Bealach nan Searrach is on the east side of Loch Lubnaig, but is almost at the same latitude as the Bealach nan Searrach CLD (above) on the western side of Loch Lubnaig.

BEALACH NAN SGLIAT  CLD R NN599121 1 477m
Bealach nan Sgliat 1866 OS 6 inch 1st edn PER & CLA

G bealach + G an + G sgliat
‘Pass of the slates’. Dwelly has sgliat as an alternative spelling of G sgliat ‘slate’. According to OSA, ‘slates are found in different places of this district. The best are the azure blue slates of Aney, on the property of Mr. Stirling of Kier, which rise of a proper breadth, ring well, stand the carriage, and resist the influence of the weather for any length of time. The inferiority of the slate at Kerinoch, on the property of Mr. M’Nab of M’Nab, is chiefly owing, not to any want of metal, but to their being less beautiful, and smaller in the size. The purple slates at Tombre, the property of Mr. Drummond of Perth, being less durable than the other two kinds, sell at the 25s, the 1000, while the others are sold at 21 s., especially the first. Very fine flags, of a gray colour, are found at Brackland, on the property of the Earl of Moray, which rise frequently 6 feet square, not above 1½ or 2 inches thick, and very smooth; yet, from their toughness, they are easily carried to a distance, and used for malt kilns, floors and pavement. Before the discovery of blue slate in this country, these flags were used for covering houses; particularly Doune Castle, built by Murdoch Duke of Albany, besides several others (OSA xi, 586).

BEINN BHREAC  CLD R NN606141 1 703m
Beinn Bhreac 1866 OS 6 inch 1st edn PER & CLA

G beinn + G breac
‘Speckled mountain’. Gaelic can be more descriptive than English when it comes to describing shade or texture in the landscape, but there are not many such names in the CLP area.

BEN GULLIPEN  PMH R NN596045 1 414m
Ben Gullipen 1866 OS 6 inch 1st edn PER & CLA

G beinn + G gulba
‘Mountain of snout’ (Meek 1998, 154). See the section Legends and the supernatural above for more details.
‘A considerable high hill forming part of a nameless range which extends from the Lake of Menteith of the farm of N. Glenny to the parish boundary of Callander on the north east’ (OS1/25/69/21).

Benledi 1837 NSA x, 349
Ben Ledi 1866 OS 6 inch 1st edn PER & CLA

G beinn + ? G leathad + ? suffix
‘Slope mountain’ based on G leathad or leitir has been suggested by Drummond (2007, 154),
but this does not fit the early forms. John Leslie, the Annexed Estate surveyor, writes ‘Near
[Callander] is the lofty mountain Beamnladia (i.e. Hill of God)’; this is the position taken by
the ministers of Callander in OSA and NSA: ‘The most conspicuous mountain is Benledi,
contracted for Beinn-le-Dia, the hill of God. This name was probably given to the mountain by
the Druids, who had a temple on the summit of it, where the inhabitants in the vicinity
assembled for devotion once a year, and it is said that this meeting continued three days’ (NSA
x, 349). However, this is certainly wrong and is in fact a facile folk etymology, reading it as le
Dia or la Dia meaning ‘with God’; the stress is on the first syllable making a nonsense of the
le Dia derivation, where the stress is on the second syllable (Drummond 2007, 154).
The meaning of Ledi is unknown, its Gaelic form is Beinn Lididh or Beinn Leididh according to
Robertson’s notes (King 2019, 329), while Watson has it as Lidi in Dwelly.20

BIORAN NA CIRCE CLD R NN558117 1 722m
*Bioran na Circe* 1866 OS 6 inch 1st edn PER & CLA

G bioran + G an + G cearc
‘Point of the hen’. ‘Hen’ in this case may mean grouse.

Bochastle 1810 Scott, *Lady of the Lake* canto V, verse xii [On Bochastle the mouldering lines. Where Rome, Empress of the world. Of yore her eagle’s wings unfurl’d]

Bochastle 1866 OS 6 inch 1st edn PER & CLA

? G both + G caisteal
Both Chaisteil[21] ‘castle hut’. Watson (1926, 240) suggests that the forms with initial m are the result of nasalisation or eclipsis due to the OG preposition i or an, ‘in’. An initial b in these circumstances becomes m, while the lenited ‘c’ in most of the forms point to G caisteal, ‘castle’; the ‘castle’ in this case being the remains of a Roman fort 200 m north-east.

However, the first element could be G mòine ‘moss’ which would suit the location between the Garbh Uisge and Eas Gobhain rivers which would have been regularly flooded in the past. The medial t in some early forms could be a vestige of the old Gaelic gen. sg. definite article ind. The element Both appears very late, it could be either re-interpretation (so generic element substitution) or generic element variation between mòine and both.

Caisteal is a fairly common element for fortifications of varying dates, i.e. Iron Age, Roman, and early Medieval, that are not normally classed by archaeologists as hill-forts. Drumquhassle druim chaisteil near Drymen, is named after the remains of a nearby Roman fort, and there are a number of broch-like structures in Glenlyon PER and near Pitlochry PER that have caisteal in their names (McNiven 2013, 71-2). The more usual element for a hill-fort in many parts of Scotland is G dùn, and one km west of Bochastle is Dunmore, a hill-fort of seemingly dating to the Iron-Age (see also Dunmore below).

An indication of the pronunciation can be seen in one of the c.1755 forms, where William Monteith, factor for the annexed estate of Arnprior, produced a report on the estate of Strathyre; here it is Bothastill (NRS E729/2/207).

‘The property of the Earl of Murray a short distance N. East of the house are the remains of a large bank of earth or mound called the moulding lines in Scott’s Lady of the Lake’ (OS1/25/12/5)

Brackland 1866 OS 6 inch 1st edn PER & CLA  [Wester, Middle and Easter Brackland shown]

The early forms make a derivation difficult. It is unlikely that it is G *breac* + G *linne* ‘speckled pool’ or Sc *brack* + *land* ‘land of the ground broken up for cultivation’. The earliest form from 1261 may have a ‘c’ rather than a ‘t’. The fairly consistent ‘o’ from 1267 to 1675 may mean the name contains G *broc* ‘badger’. Dwelly has an obsolete meaning of *broc* as being ‘grey, dark grey’. *Broc* may be functioning as an adjective, i.e. ‘badger-coloured’, it would regularly cause lenition if it comes before the noun it is qualifying, regardless of gender of that noun. OG *brocc* ‘badger’, is found in noun + noun compounds, including names, e.g. Brocros (Hogan 1910, 128). The second element, then, could be G *tulach*, so the early forms may be for *broc thulaich* ‘badger-coloured, grey mound’ or ‘badger hillock’. Brackland is in the barony of Doune in ER, but was part of the ‘tak of the paroch kirk of Callander’ in the *Books of Assumption* (Kirk 1995, 349).

It is notable that there are differences in how the OS spells the name: the famous Bracklinn Falls, which are nearby, are named *Falls of Brackland* in 1st edn OS 6 inch map in 1866, and they are crossed via the *Bridge of Brackland* and both are in the *Brackland Glen*. On the present 1:50,000 Landranger map the farms are all Brackland with their respective prefixes of Wester, etc, but the falls are Bracklinn Falls. On the present 1:25,000 Explorer the farms are all Bracklinn with their respective prefixes of Wester, etc, while the Bridge of Brackland crosses the Brackland Falls that flow through the Brackland Glen. Furthermore, the Bracklinn Falls are on the Keltie Water, not the Brackland Burn! The current farmer has always known it as Bracklinn, which it was when his father farmed here in the 1950s.

The name is spelled ‘*Braclan* (a flat)’ in Watson’s notes (Coll-97/CWP/69).

²⁴ From farmer at West Brackland/Bracklinn.
Bracklinn Falls 1956 OS 1:25,000 NN60

en Brackland + ScEng fall
For Bracklinn see Brackland CLD above. In his Lady of the Lake, Sir Walter Scott writes of ‘Bracklinn’s thundering wave’ (Canto II, verse xiv) and ‘Bracklinn’s chasm, so black and steep./ Recieves her roaring linn’ (Canto VI, verse xviii). They are described in the OSNB as ‘a succession of small waterfalls, six in number, formed by Keltie Water, in a ravine about a mile from the village of Callander. The descent in all is about eighty feet. On either side the rocks are perpendicular and fringed with trees, those on the east being intermingled with firs’ (OS1/25/12/23).

OSA has a fantastic description of the glen and its falls – ‘In the glen betwixt Brackland and Achinlaich, there is a bridge on the water of Kelty, confining of 2 sticks, covered with a few branches of trees and some turf, which is abundantly romantic and dangerous. The sticks are laid across the chasm, with their ends resting on the rocks, which project on opposite sides, about 50 feet high, above a deep pool: On the one hand, the white cascade precipitates itself, from a height above the bridge, with a tremendous noise, occasioned by the conflict of the rocks, the narrowness of the passage, and the lofty column of water, whose spray often wets the clothes of passengers. On the other hand, the winding glen, which deepens as it descends, the gloominess of the hanging rocks, of the shading trees, and black pools, strikes with terror and with awe. Yet the people of the adjacent farms, from the mere force of habit, pass and repass with very little concern; although though the very act of looking down, when there is a flood in the water, must fill the head of a stranger with a swimming giddiness, owing to the altitude of his situation, the dening roar of the torrent, the gloomy horror of the glen, and the whirling of the pool below, into which the cascade falls, rolling, tossing, thundering down’ (OSA xi, 590-1).

25 The ‘tour’, or tower, of Callander lay on the south bank of the River Teith at approx NN629076 (see RCAHMS Canmore NMRS no. NN60NW 8).
G ?

Watson (Watson 2002 [1913], 130) has Calasraid ‘harbour-street’ ‘ferry-street’, which is almost what the minister for Callander has in OSA.26 By the time Watson wrote CPNS in 1926, he stated that ‘Callander on Teith…is a transferred name from Callander (sic)27 near Falkirk’ (Watson 1926, 106), and it is probably the case that from at least the sixteenth century the form of the Menteith name has been influenced by Callendar STL. It is notable that Watson states that Callender on Speyside (Woods of Callander is at NJ146366, midway between Grantown-on-Spey and Charlestown of Aberlour) is derived from old Celtic *caled ‘hard’. Quite what is ‘hard’ about such rivers (Calder/Cawder river-names are found throughout Scotland) is difficult to say. Is it because they are particularly rocky? Or is it to do with the force of flow of such rivers as the punch their way through the landscape? As well as being in river-names like Calder, *caled is also found in names such as Callander, Keltie, and is the root of the tribe Caledonians. Callander is near the Keltie Water, just as is Callander near Crieff; the Keltie Burn flows just 400 metres east of Mains of Callander. There is much thinking to be done on this puzzling name yet!

The earliest form dating to 1238 may be a transcription error. This comes from a charter concerning the foundation of Inchmahome Priory printed in the Inchaffray Liber, which in turn comes from Rev MacGregor Stirling’s Notes on the Priory of Inchmahome (MacGregor Stirling 1815); MacGregor Stirling had seen the original charter, now lost (see Hutchison 1889, 136, note 1 for details of this charter). Given that he was responsible for the ‘Isle of (my) Rest’ derivation for Inchmahome, perhaps we should not be too confident in his transcription of Callander in his book.

The early Calen/Caling forms may relate to the original name of the estate, which may have straddled the River Teith. Calenbrate etc may have been a subdivision of this estate, and the sraid element, also found in Straid KMA, perhaps relating to a potential Roman road between the Roman forts at Doune and Bochastle. Some of the early forms contain –drate, which might be for drochaid ‘bridge’ (c.f. Poldrait Poll (na) Drochaid, Glasgow (Taylor 2007a, 3) and Ballindrate, Co. Donegal (Flanagan and Flanagan 1994, 74)). The Calen- element, although obscure, seems to be found in nearby Coihallan Wood to the west of the modern town, probably G *coille chailin or chalan or some such.28

en Callander + ScEng castle

The annexed estate report of 1775 states that ‘At East Mains was the original seat of the Earls of Callander where the Old Castle stood till within these three years past’ (NRS E777/313/3). It was stated in the late eighteenth century that ‘There are the remains of an old castle at the

26 ‘...Calla-straid, which is the Gaelic name given to it by the common people: Calla, signifying the landing place at the Ferry, where the village is built; and Straid, the street or avenue leading from the castle of Callander to the same ferry.’
27 Now normally spelled Callendar.
28 My thanks to Jake King for bringing this to my attention.
manse of Callander, which was built or repaired by in 1596, by Livingston Earl of Linlithgow ... It was forfeited in the reign of James I or II, and given to the Livingstons ... they either enlarged or rebuilt the castle, and inscribed the name of the own family, and the year, on the door-head. This land was sold to the family of Perth, about the year 1630’ (OSA xi, 608-9). In a footnote to the above the minister for Callander states that the ‘this castle was mostly taken down in 1737’ (OSA xi, 609). ‘The site of this castle is situated on the south bank of the River Teith and is within a few yards of the Manse. There are no vestiges now remaining. Several human bones were unearthed a few years ago by the workmen who were employed in levelling the site. The date of its erection is not authentically known’ (OS1/25/12/35).

Callendrade 1948 OS 6 inch PER & CLA

There are two places within 200 m of each other called Callandrade and Callandrade Cottage on the current OS 1:25,000 Explorer map. On the OS 6 inch 1st edn, they are Callander Cottage and West Mains respectively. West Mains is shown on the Annexed Estate plan NRS E777/313/2, and this may be Westir Callander mentioned under Callander above in the Books of Assumption of the Thrids of Benefices from the 1560s. East Mains, presumably Eister Callander in the 1560s, is shown on NRS E777/313/14 just along from West Mains and is shown on the other side of what is now the A81 road from West Mains on the OS 6 inch 1st edn map. John Leslie wrote in 1775 that ‘At East Mains was the original seat of the earls of Callander where the Old Castle stood til within these last three years bypast’ (NRS E777/313/3). Stobie has a ‘Big Hoose’ symbol called E. Mains there. The modern names may be antiquarian re-namings. See discussion of Callander, above.

Gen *Cambus (1)+ G beag
Camas Beag ‘small Cambus’. The camas generic may relate to the large semi-circular bend in the River Teith between Callander and Cambusbeg or a large bend in the Kelty Water near where Cambusmore (see below) sits. This is a sub-divison of what was presumably a place called *Cambus or *Camas analogous with the Scots affixes Easter, Wester, Upper, Nether, etc., found in place-names. Note that in 1565 Cammis-Eistir was Cambusbeg, while in 1608 Cambusbeg-Westir was Ballachallan. This is one of two areas on the north bank of the River Teith that that derives from G camas. Another area c.4 km south east of Cambusbeg contains a number of ‘Cambus’ names, but this time in Scots, such as Burn of Cambus and Carse of Cambus.

Coilantogle 1866 1st edn OS 6 inch sheet

G cúil+ G an + G seagal.
Cùil an t-Seagail ‘nook of the rye’. The current form, containing coil-, presumably for G coille ‘wood’, may be a later reinterpretation. The forms in ER ix –xi (1480 – 1499) are best seen as written by someone who misunderstood what was being said or had been written. The only way it is possible to tell that Colydoglen and the other early forms are in fact Coilantogle is by its place in the list of rentals, and the consistent rent throughout of ‘iii l, vi s, viii d, ii bolle ordei, ii mutones’, although note the rent asks for two bolls of barley (ii bolle ordei), not rye.

The name is spelled Cùil an t-seagail in Watson’s notes (Coll-97/CWP/70).

\ˌkələnˈtɔglə/

COILANTOGLE FORD    CLD W NN597065 1 85m
    Coilantogle ford 1810 Scott, Lady of the Lady Canto V verse xi
    Coilantogle Ford 1866 1st edn OS 6 inch sheet

en Coilantogle + ScEng ford
A ford on the Eas Gobhain near where the river exits Loch Venachar. This was the scene of a combat between the two main protagonists in Scott’s Lady of the Lake. The ford is marked ‘disused’ on the OS 6 inch 1st edn map; this is probably due to the Glasgow Corporation Waterworks built at Loch Venachar in the nineteenth century as part of the water supply for the growing city of Glasgow. ‘There is no ford here now but still the place is well known the name. Since the building of Gartchonzie Bridge about ½ a mile to the north the Ford has become disused’ (OS1/25/12/6).

COILHALLAN WOOD    CLD V NN615070 1 120m
    Coilhallan Wood 1901 OS 6 inch 2nd edn PER & CLA

G coille + ? en Calen
This may contain the Calen/Calyn of seen in the early forms of Callander CLD. and discussion under Callander CLD. ‘A large wood on the south side of the River Teith. It is chiefly oak and is cut down every 21 years for its bark’ (OS1/25/12/5).

G coille + G cat
Coille Chait or Chat ‘cat wood’ or ‘cats’ wood’ or Coille a’ Chait ‘wood of the cat’. Cat here
could mean the wildcat, or possibly simply the domestic cat. The z (originally a yogh) is being
used to signify the palatalisation or slenderisation of the preceding l. It is relatively common in
Scots spellings of Gaelic-derived words and names. Mackay states Coillechat is pronounced as
‘killyhat’ (2003, 48). This is one of several properties which belonged to the Muschets of
Kincardine or Burnbank. It was not part of the Stewartry of Menteith and therefore does not
appear in earlier volumes of the Exchequer Rolls, despite the fact that Ballachraggan and
Calziebohalzie, the lands on either side of Coillechat, often do.

*Dalverich* 1783 Stobie
*Dalvorich* 1866 OS 6 inch 1st edn PER & CLA

G *dail* + ?
This specific of Dalvorich has similarities to the specific in the early forms of Balvorist KMA, q.v. above. We could be dealing with the name Maurice here or rather a Gaelic adaptation of it, c.f. Balvorist KMA, above. One possibility is that it is one the earls of Menteith immediately prior to Walter Comyn becoming earl in 1238 (see McNiven 2011, Chapter 4). Another possibility is a saint’s name, Muireadhach, cf. Kilmorich, now part of Lochgoilhead in Argyll (Watson 1926, 293). See also Balvorist PMH.

/dəlˈvɔrɪʃ/

**DUNMORE**  CLD A NN601075 1 190m

*Dun bo chaistil* 1837 *NSA* x, 354 [Dun bo chaistil ‘hill of the castle’]
*Dun of Bochastle* 1837 *NSA* x, 355
*Dunmore* 1866 OS 6 inch 1st edn PER & CLA
*Dunnmhor* 1898 Walker (1898, 4)

G dubh + G leitir
*Dubh-Leitir* ‘dark hill-side’. G leitir is a ‘slope’, and ‘always slope towards water, stream or loch’ (Watson 2002, 185); in particular, they are often found on steep slopes in U- or V-shaped valleys (Fraser 2008, 185-6). The name refers to the settlements at the foot of north-facing slopes of Ben Gullipen and Beinn Dearn.
G dùn + G mòr

Dùn Mòr ‘great or big fort’. Stobie (1783) shows Old Castle at this point. The 1837 form suggests a probable antiquarian connection with said Roman fort at Bochastle CLD (see above). This form comes from the minister of Callander, whose Gaelic is suspect, ‘A mile west of Callander, there are the remains of a fortification on top of a hill, called Dun bo chasitil, the hill of the castle’ (NSA x, 354). The correct form, had the fort been called it, would be Dùn both chasiteil ‘hill-fort of the hut of the castle’. Details of the fort can be found at RCAHMS Canmore, NMRS no. NN60NW 7. No indication of a date for the fort is given is given there; however, hill-forts on the northern edge of the Ochil Hills around Forteviot and Dunning, investigated as part of the University of Glasgow’s SERF project, have so far yielded C14 dates of late Bronze early iron Age (Steve Driscoll pers. comm. 24th Sept 2013). It was doubtless a very important fort, and perhaps the reason why the Romans built their fort nearby. ‘A small but tolerably high hill on the farm of Tarandoun. On its summit is a very entire fortification which is defended on the N. & N.W. and S.W. sides by three tiers of ramparts or mounds and the east by the natural face of the hill which is inaccessible, rough and rugged with outcropping rock. Concerning it there are no traditions in the locality farther than the authorities attribute it to the Roman period. But its shape and form is more in keeping with the ancient British fortifications. In the centre of it, a well is visible which is nearly filled’ (OS1/25/12/3).

EAS FIADHAICH CLD W NN662091 1 E366 175m

Eas Fiadhaich 1866 OS 6 inch 1st edn PER & CLA

G eas + G fiadhach

‘Wild or angry waterfall’. ‘A glen nearly three quarters of a mile in length and of varied breadth, through which flows Brackland Burn. It is partially covered with wood and is, in some places, almost inaccessible. Means Wild Glen. Property of the Earl of Moray. Eas not applied to the glen but to the stream with its high precipitous banks. Eas, A waterfall, A stream with high precipitous banks29 (OS1/25/12/21).}

EAS GOBHAIN CLD W NN622076 1 65m

Eas-gobhain 1837 NSA x, 357 ['the river which flows out of Loch Venachoir on the south side of Benledi, Eas-gobhain (the waterfall or cataract of the Smith)']

Eas Gobhain 1866 OS 6 inch 1st edn PER & CLA

G eas + G gobha

‘Smith waterfall. Eas Gobhainn. ‘A considerable river flowing from Loch Vennachar in an easterly direction, it is joined by another equally as large near Callander which is called Garbh Uisge from thence it flows southerly and is called the River Teith to its junction with the River Forth near Stirling’ (OS1/25/12/5). However, also noted in the same OSNB was the following ‘This river is not known by the name ‘Eas Gobhain’ by any person in the neighbourhood’ (OS1/25/12/5).}

EAS NA CAILLICH CLD W NN639099 1

Eas na Caillich 1866 OS 6 inch 1st edn PER & CLA

G eas + G an + G cailleach

‘Waterfall of the hag or old woman’. Nearby is Coire Eas na Caillich. See Legends and the Supernatural for discussion of Cailleach.

29 The last two sentences written in pencil in a different hand.
EAS UILLEAM  CLD W NN685087 1 115M
  Eas Uilleam 1866 OS 6 inch 1st edn PER & CLA

G eas + pn Uilleam
‘William’s waterfall or cascade’. It is not known who the eponymous Uilleam was.
‘A deep but narrow glen having its southern end close to Spout an Leachaich and extending
northwards, nearly a quarter of a mile. Its sides are covered with natural wood for the whole of
its length. Means William’s Glen’ (OS1/25/12/22).

  Gart 1783 Stobie
  Gart 1866 OS 6 inch 1st edn PER & CLA

G gart
Gart ‘enclosed settlement or field’. This is one of a large number of gart-names to be found
between medieval Fife and the River Clyde (McNiven 2007, 61-2). It is unusual to find gart as
a simplex, and indeed there appears to be only two others in this fairly large distribution area; Gart, now Garden, in CUS FIF (Taylor PNF i, 244) and Garth in DNY STL (Reid 2009, 58).

The grazing of Gart, mentioned in 1775, lay in the hills above Callander town on the boundary of CLD, north-west of Thomasgreen CLD.

  Wester Gartchonzie 1866 OS 6 inch 1st edn PER & CLA

G gart + pn Coinneach, gen. Choinnich ? or còinneach ?
Gart Choinnich or Chòinnich ‘Kenneth’s enclosed field or settlement’ or ‘mossy, foggage enclosed field or settlement?’. The specific may be the saint’s name Coinneach, earlier Cainnech (see A. Watson 2002, 149, for his discussion of this term with Dalchonzie COM, PER). Gart + personal name is not common, but see Gartfinnan CLA and Gartwhinzean KNR, where the specific may be Finnan in both cases (McNiven 2007, 71, 74). An alternative explanation for the specific could be G còinneach ‘mossy, foggage’, c.f. Ben Chonzie Beinn na Còinnich ‘mossy mountain’ in Drummond (2007, 206), and Còinneach Bhlàr CLD ‘foggage plain’. NGR is for Easter Gartchonzie.

This is spelled Gar-choinnidiadh in Watson’s notes (Coll-97/CWP/69).

G grianag.
Grianag ‘sunny knoll’. The early forms could suggest OG or MG grianóc ‘sandy place’, however, it is also possible that it represents an adjectival form grianach ‘sunny (place)’ The name probably alludes to the settlement being on a south-facing slope, see Watson (1926, 201) for a short discussion of this name.

/ˈgrinɔk/

GREENOCK BURN   CLD W NN641051 1 70m
   Grinok with the burn of Alt-Whurr 1630-50 Sibbald TNS 156v
   Greenock Burn 1866 OS 6 inch 1st edn PER & CLA

en Greenock + ScEng burn
The Greenock Burn seems to have been called Alt-Whurr (G Allt Odhar ?) at least in the first half of the seventeenth century. ‘A middling sized burn, which has its source a little to the west of Braes of Greenock, and flows in an easterly direction until it joins the … Torry Burn’ (OS1/25/12/27).

IBERT   CLD S NN627078 2 70m
   Ibertis 1560s Books of Assumption (Kirk 1995, 349) [the tua Ibertis’, 1 b meal]

OG idbard; G iobairt
Iobairt ‘offering or sacrifice’. This is the only reference to the existence of an Ibert in CLD. The NGR is for a building called Mansefield CLD, next to the site of the old kirk near Tom ma
Chisaig (NN626078). Watson (1926, 254) points out iobairt is ‘an offering or gift of land to a church’.

**KELTIE WATER** CLD W NN650048 1 55m

- *Kailty* 1630-50 Sibbald TNS 156v
- *water of KeltY* 1791-99 OSA xi, 590
- *the burn of KeltY* 1791-99 OSA xi, 607
- *Keltie* 1837 NSA x, 352 [at (the bridge of Brackland) the river takes the name of Keltie]
- *Keltie Water* 1775 NRS E777/313/104
- *Keltie Water* 1866 OS 6 inch 1st edn PER & CLA

en Keltie + ScEng *water*
Keltie itself derives from G *cailitdh*, ultimately from an Indo-European root *caleto-* meaning ‘hard’. In the seventeenth century there was the presumably settlement name of *Innerchailty* (Sibbald TNS 156v). See also Callander, above, and PNF i, 173-4 for discussion of Keltie FIF.

‘A large stream which rises in the moors, east of the village of Callander and flowing southwards through Brackland Glen, joins the River Teith near Cambusmore. Its banks are generally high and the current rapid’ (OS1/25/12/24).

---

31 CPL has Kilmaling, but note Cockburn (1959, 70), quotes the above, but in an endnote on page 80 writes the following important information:

‘C[alendar of] P[apal] R[egister] 1 367. There is no such parish in the diocese [of Dunblane]. I thought at one time that the chapel at Malling, attached to, and near, Inchmahome Priory was meant, but it was not in the Bishop's patronage. I finally concluded that this word was a misreading of Kilmahug, near Callendar. From Mr Peter D. Partner, whose assistance I asked while he was working in the Vatican Library, I received this confirmation, 9 Sept. 1954: ‘I have consulted the original register and I find that your conjecture is perfectly right. The word, quite clear, and repeated twice, is KILMAHUG’.

G lag + G raineach
‘Ferny or bracken hollow’. This place is now the name of an industrial estate at the eastern edge of the town of Callander AT NN636071.
This name is spelled An Lag raineach in Watson’s notes (Coll-97/CWP/69).

LENY KIRK CLD E NN622077 1 67m
Kirk of Leny 1630-50 Sibbald TNS 131v
Little Leney 1791-99 OSA xi, 610
Little Leney 1837 NSA x, 356 [Little Leney, where there was a chapel of old]

See Leny House below for analysis. OSA states that ‘There is another hill, larger than Tomma-chessaig, at Little Leney, where Norie’s Chapel stood,32 which is still used as a cemetery by those of the name Buchanan’ (OSA xi, 610). There are the remains of a building on top of the mound, and nearby is a mausoleum to the Buchanans who held Leny for much of the later Middle Ages and beyond. Buchanans’ burial place is spelled Lànaidh Bheag in Watson’s notes (Coll-97/CWP/70).

33 My thanks to Prof. Dauvit Broun for allowing me to use his unpublished edition of this charter.
G lèan or lèana
Lànaidh ‘damp meadow; swampy plain’. The area around the old church of Leny is frequently flooded in winter. Watson gives it as Lànaigh (1926, 145), which he holds to be different in derivation from Lennie, Corstorphine MLO, but fails to give any meaning. Leny House sits 1.5 km north west of the site of the old kirk, but was the secular centre of the estate of Leny. In the grounds, next to the main A84 road are said to be the remains of the castle of Leny, which are marked on the OS 6 inch 1st edn PER & CLA map as Caisteal Briste ‘broken castle’. The site of the old Kirk was later called Little Leny (Thomson 1985, 9). The 1238 form seems to contain the G –in suffix, meaning ‘place of’ or ‘place at’, which would be the only certain occurrence of it in Menteith; however, see Callander CLD, above, for reservations regarding the source. This is unlike Fife and elsewhere in eastern Scotland (there are seventeen place-names with this ending attested in PNF i alone; see, for example, Logie, Dunfermline parish), although it occurs on the borders of Menteith in Cashley in Drymen parish and Menstrie in Alva parish, CLA where they were Cacelyn and Mestryn in 1213 x 1261 (RRS ii no. 519). The general absence of this locative ending in Menteith is probably much to do with the lateness of the evidence, where there are so few place-name forms from before c.1300, by which time it has been reduced to –ie/-y in places like Fife. See Ó Maolalaigh (1998, 30–8) and Taylor, PNF v, (Elements Glossary, forthcoming) for discussion of the –in suffix.

The place is called Lanaigh according to Robertson’s notes (King 2011, 171). The name is spelled Lànaidh in Watson’s notes (Coll-97/CWP/70), where it is also stated ‘Lànaidh being the name of the low lying wet ground on the west bank of the Teith west of Callander’.

/ˈlɛnɪ/
Kessanachs were originally named for their ancestors devotion to St Kessog. See also Bealach nan Corp above and Tom ma Chisaig below.

*Loch Lubnaig* 1866 OS 6 inch 1st edn PER & CLA

G loch + G lùbchnach

*Loch Lubnaig* ‘little loch of place of curves or bends’ (A. Watson 2002, 92-3). Cf. G lùb, OI lúb ‘bend, twist’. See Watson (1995, 95), who has a short entry on *Lipney*, now Dumyat Farm LOI STL, which has many of the same early forms as are shown here and this has confused him and others, including John Harrison and RCAHMS (2001 16, fn 16), into thinking these deal with *Lipney*. However, *Lipney* is almost always shown in conjunction with *Fossakie, Ashintrule (or Lossinrule)*, Logie, and Blairlogie, all of which are lands and settlements surrounding Dumyat LOI STL. What clinches it, aside from references such as the charter granting Stirling of Keir the lands of *Lubnoch* in the barony of Strathgartney (*Lipney* is in the

34 See, for example, villam de *Logy, Bilarlogy, de les Pullis, de Lubnach, de Fossacy, Lossyntrule* (1451 RMS ii no. 462); *Logy...Blair de Logy...Le Pullis...Fossoquhy...Lupnoucht et Lessinrule* (1502 ER xii, 638); terrarum et baroniae de *Logyblair, continentis terras de Lipnocahe, Ashintrule, Fossoquhyemane, Logye et Blair* (1635 Retours STL no. 156); the lands and barony of Logie Blair, containing the lands of Lipnoch, Ashintrule, Fassochie maner, Logie and Blair (1685 NRS PA2/32, f.187-188v). None of these examples, and they are typical of many others, mention fishings of *Lipney* (or its earlier variants), for the simple reason that there were none.
barony of Logyblair), are the references to fishings at Lupno; there are no fish worth eating that warrant a mention in any charter of the Kings of Scots to be had in the Menstrie Burn, the nearest stretch of water of any consequence to Lipney.

The name is now found in Loch Lubnaig, but there are indications from Pont and Gordon that Lubnaig was not the only name for this loch. In a map drawn in 1636-56, Gordon shows Loch Heuure (NLS Adv.MS.70.2.10 (Gordon 51)), while Pont, copied by Gordon c.1630-50 writes of ‘Strathheuure … at Loch-heuure head’ (Sibbald TNS, 144r).

According to Robertson’s notes the name of the loch is ‘Loch Ludnaig rarely Lubnaig’ (King 2011, 171); Watson largely concurs with Lùdnaig (Coll-97/CWP/70).

Banchor may derive from G beann + G cor
‘Horned loch’? If G beann and G cor are the elements involved, then they mean literally ‘horn-cast or horn-setting’ (Watson 1926, 480–81). G beann (OG benn) is, of course, ‘a mountain, a peak’, but it also means ‘a horn or a point’ and the name probably refers to the pointed eastern end of the loch. Modern ScG beinn was originally the dative singular of this word. Watson states that it means ‘horn-cast’, usually in reference to horn-like bends in a river (1926, 481–2). The name is found in Banchory in Aberdeenshire and Clackmannanshire, and in Glen Banchor near Newtonmore in Badenoch.

G baile +G an + G muileann; Sc mill + Sc toun
‘Mill steading’. Sc Miltoun is a direct translation of G Baile a’ Mhuilinn. This re-naming occurs within ten years of Baile Mhuilinn/Milton coming on record. What is also notable, however, is that what is now called Milton Glen Burn, whence the mill got its power, was still called Allt Gleann Baile Mhuilinn as late as 1895 (see OS 1 inch 2nd edn 38). However, this may be a reflection of OS naming practices, where Scots/English names were given to settlements but Gaelic names to burns and relief features in certain contexts, but nevertheless, may be an indication that Gaelic was still being spoken in this area 1860s.

SRON A’ CHOIRE NATHRACH   CLD R NN610128 1 500m

Sròn a’ Choire Nathrach 1866 OS 6 inch 1st edn PER & CLA

The chapel of St Bride is described at RCAHMS Canmore NMRS no. NN50NE 3. There are two place-names associated with the chapel: Creag a’ chaibeil and Àth a’ chaibeil, or ‘rock’ and ‘ford of the chapel’ respectively. The former is opposite the chapel on the Anie side of the A84 road, while the latter is a ford across the Garbh Uisge ‘rough water’, to Coireachrombie. See Loch Lubnaig CLD above.

St Bride’s Chapel is undoubtedly old and two stone cross slabs were found in work carried out at the site in 1934 and 1971. They have been dated to between eleventh and thirteenth centuries (see Canmore ref. above), but there is no indication here as to how early the dedication to Bride is. St Bride was Briget of Kildare, who died in Ireland in the first half of the sixth century.

*the straid* 1770s NAS E777/313 [Plan of the straid, by John Leslie, surveyor]
*Straid* 1783 Stobie
*Staait* 1866 OS 6 inch 1st edn PER & CLA

G sràid
Sràid ‘street, road’. Road must be the preferred meaning here in such a rural location. Bain has ‘Early Irish sráit’, c.f. *DIL* which defines sráit as ‘street, road, path, way’. Straid, about five km from the Roman fort at Bochastle and eight km from the Roman fort at Doune, may indicate a Roman road or other paved road (c.f. Barrow (1992, 210) where he writes of Old English straet as being a possible indicator of Roman roads). The modern A84, the main road between Callander and Doune, and also marked as an Old Military Road near Straid, follows the likely course of the Roman road connecting the two forts, or close to it.

G tòrr + G an + G dùn
Tòrr an Dùin ‘conical hill of the fort’. The dùn refers to the fort at nearby Dunmore, c.200 m to the north. Assuming the generic is ScG tòrr, then this is one of small number of tòrr -names in Menteith: there is also Torrie KMA, Upper, Lower, and Easter Tarr surround Tamnafalloch KMA, and in KRD there is Mill of Torr. There is an unmarked building on the 1:25,000 OS map at the above NGR.

The name is spelled Tar an dùin in Watson’s notes (Coll-97/CWP/69).

en Tom Bheithe

This was one of the two mills of the barony of Callander; the other was the mill at Gartchonzie. In c.1755 the surveyor for the Commissioners of the Annexed Estates described the situation as: ‘the miln of Tombea was built around the year 1736 & the Barony of Callander benorth the water of Teith thirled to it’ even though the ‘place lyes quite away from that part of the barony thirled to it’ (NRS E729/2/19). The name is spelled *Tom-beithe* in Watson’s notes (Coll-97/CWP/69).

**TOM BHEITHE** CLD R NN582119 1 186m
*Tom Bheithe* 1866 OS 6 inch 1st edn PER & CLA

G tom + G beithe
‘Birch hillock’.
G tom + G dubh
‘Black hillock’. ‘A small oblong-shaped knoll, situated on Sruth Geal and east of Easter Brackland. Means Black Knoll’ (OS1/25/12/26). One of three such hills named close by each other; the others are at NN647099 and NN672089.

G tom + G flùr
‘Flower hillock’. Earlier ‘Hillock of the flowers’.

G tom + G an + G ulaidh
‘Hillock of the treasure’.

G tom + G mo + pn Cessóg
‘Hillock of my Kessog’. The medieval church of Callander stood near the mound called Tom ma Chisaig ‘mound of my Kessog’ at the northern end of the bridge of Callander. In 1771, despite wishing to ‘have the stance of the Kirk continued in the present Kirkyard’, the parishioners saw their church moved to the centre of modern day Callander (Thompson 1985, 18). Kessog is especially associated with Luss, Dunbartonshire, where he is supposed to have been martyred and buried, and is also associated with Auchterarder and Comrie in Perthshire (Macquarrie 2012, 375-6). In Glenfinlas is Gleann Casaig (Glenkassik 1451), which probably commemorates Kessog. Nearby is Cladh nan Casan (or ‘Ceananach’ as W.J. Watson has it), which seems to mean ‘graveyard of Kessog’s people’. Kessog’s name also appears in personal names in Menteith: Murtho Kessokissone and Kessok Murthauson are both mentioned as tenants in the lands of Cessintullie KMA in 1486 (ER ix, 627).

‘A small circular and apparently artificial mound on the banks of the Teith close to the bridge. It is supposed to have been erected by the Romans, but tradition gives no information respecting it. ‘Their [sic] is a beautiful circular mount adjoining the church-yard of Callander, called Tom ma Chessaig, the hill of St Kessaiag who was tutelar saint of this place. A market is still held here annually in the month of March, which goes by the name of Feile ma Chessaig, i.e. festival of St Kessaiag’. Extract from Statistical Account. ‘St MacKessoge or Kessoge. C. Bishop in the provinces of Levin and Boin in Scotland’. – ‘This saint was illustrious for miracles and died in 560s A celebrated church in that country still bears the title of St Kessoge Kirk. The Scots for their cry in battle for sometime used his name, but afterward changed it for that of St Andrew’ Extract from Butlers lives of the saints. Perhaps the name had better be
written in German txt as although the mound doubtless belongs to the period entitled to that character, it is doubtful if it belongs to the Old English or Roman periods\(^\text{37}\) (OS1/25/12/11).

**TOM A’ MHUilCEINN**

*Tom a’ Mhuiliceinn* 1866 OS 6 inch 1st edn PER & CLA

\[\text{G tom + G an + G muinichill\(m\)uil(i)cheann}\]

‘Hillock of the sleeves’. It is not known what this name represents.

**TREAN**

*Trien of Leny* 1677 Dunb. Tests., 21 [John Buchanan in]

*Trien* 1684 Dunb. Tests., 53 [Patrick Ferguson in]

*Trean* 1783 Stobie

*Trean* 1843 RHP1442/1

*Trean* 1866 OS 6 inch 1st edn PER & CLA

\[\text{G trian}\]

*Trien* ‘third part’. Another ‘third part’ can be found near Leny LXY, CLD: Trean Farm, *Trien* on Stobie in 1783. Watson says that *Trien* was rare (1926, 236) and yet we seem to have it twice in Menteith. It also occurs in KPN in *Treinterane* (1451 ER v, 475), probably G *trian* + G *an* + G *siorram*, part of the estate of Glentirranmuir KPN STL. However, since ‘thirdpart’ is common all over Scotland, this may be a Gaelicisation of a Scots term.

The name is spelled *An Trian* in Watson’s notes (Coll-97/CWP/70).

/ˈtrian/\(^\text{38}\)

**TUIM BHROC**

*Tuim Bhroc* 1866 OS 6 inch 1st edn PER & CLA

\[\text{G tom + G broc}\]

‘Badger hillock’. This hillock must originally have been called Tom Bhroc or Bbroic. However, it might be that either *Eas Dearg* ‘red cascade’ or *Eas an Fhithich* ‘waterfall of the raven’, the small burns immediately west of Tuim Bhroc, may originally have been called Allt an Tuim Bhro(i)c and this has influenced the name of the hill. Allt an Tuim Bheithe flows just to the south of Anie, nearly three km west of Tuim Bhroc.

**TYNASPIRIT**

*KMA S* NN663046 1 62m

*Tynaspirit* 1866 OS 6 inch 1st edn PER & CLA

\[\text{G tigh + G an + G spiorad?}\]

‘House of the spirit’. Spirit here could mean ‘alcohol’, but given there is a Bogle Burn nearby (and a settlement of that name, i.e. Bogleburn, shown on Stobie), we may be looking at a play on Sc *bogle* ‘a ghost’.

**UAMH BEAG**

*CLD/KMA R* NN691118 1 E368 656m

Appendix
Evidence of Gaelic in the 18th and 19th centuries by Sarah Scott, volunteer at Callander’s Landscape.

REPORTS ON THE ANNEXED ESTATES, CALLANDER AND STRATHGARTNEY
Noted below is information on Gaelic speakers in the Baronies of Callander and Strathgartney, taken from the reports of 1755 and 1775. I did not find any relevant information in the 1765 report relating to language issues.

1755: Report by John Campbell of Barcaldine on the Barony of Callander

Observations
The minister, Mr James Steuart “preaches one half of the Day in the English & the other half in the Irish language. The stipend payable to him out of the estate of Perth, both in the baronies of Callendar & Strathgartney, which is likewise in this parish, is £12.10.1 10/12 sterling.” “Most of the people here speak the English Language and the Law prohibiting the Highland Dress & wearing Arms have taken place in this Barony.”

Statistics
Within the town of Callander, the report gives the following statistics for its feuars and their ability to speak English:

<table>
<thead>
<tr>
<th>Category</th>
<th>Number</th>
</tr>
</thead>
<tbody>
<tr>
<td>Number of families</td>
<td>123</td>
</tr>
<tr>
<td>Aged under 10</td>
<td>140</td>
</tr>
<tr>
<td>Aged 10-17</td>
<td>70</td>
</tr>
<tr>
<td>Adult males</td>
<td>135</td>
</tr>
<tr>
<td>Adult females</td>
<td>178</td>
</tr>
<tr>
<td>Total individuals</td>
<td>523</td>
</tr>
<tr>
<td>Number able to speak English (percentage)</td>
<td>388 (74%)</td>
</tr>
</tbody>
</table>

The farms in the Barony of Callander and their inhabitants were enumerated and the following statistics given for the inhabitants and their ability to speak English. The figures for the twelve individual farms are set out more fully at the end of this section:

<table>
<thead>
<tr>
<th>Category</th>
<th>Number</th>
</tr>
</thead>
<tbody>
<tr>
<td>Number of families</td>
<td>94</td>
</tr>
<tr>
<td>Aged under 10</td>
<td>109</td>
</tr>
<tr>
<td>Aged 10-17</td>
<td>51</td>

</tr>
<tr>
<td>Total individuals</td>
<td>402</td>
</tr>
<tr>
<td>Number able to speak English (percentage)</td>
<td>285 (70%)</td>
</tr>
</tbody>
</table>

1755: Report by John Campbell of Barcaldine on the Barony of Strathgartney

Observations
“The furthest off part of this barony from the town of Callendar, where the parish church is, is about seventeen miles and in all this tract there is but one school, at a place called Ardkinnochrokan, which is a charity school and which, in that part of the country, can be of service only to a few farms in the neighbourhood of it.”
“Mr. Conochar, the non-juring clergyman, who was lately banished the kingdom, used frequently to preach in this part of the country, and when people were found fault with for hearing him, they gave as a reason that they had no access to any other clergyman and wished much they had.”

“The laws prohibiting the wearing of arms & the Highland cloaths have taken place here, fully as to the arms, and they have complied with the Act of Parliament by laying aside the plaid, the little kilt and the trews and every thing else specified in the Act, but many of them have substituted in place of it a dress that bears a strong resemblance to it … This dress makes the people of that country easily distinguishable, but such of the tenants upon the estate of Perth as wore it have promised faithfully to conform themselves to the spirit & intention of the Act of Parliament and never more to be seen in that kind of dress.”

“The English language has made a surprising progress in this country, considering the disadvantage it lyes under for want of schools.”

**Statistics**

The farms in the Barony of Strathgartney and their inhabitants were enumerated and the following statistics given for the inhabitants and their ability to speak English. The figures for the fourteen individual farms are set out more fully at the end of this section:

<table>
<thead>
<tr>
<th>Number of families:</th>
<th>100</th>

STATISTICAL ACCOUNTS

Parish of Callander
Old Statistical Account (1794), Rev. Mr James Robertson

- The report starts with the Gaelic etymology of the name Callander and throughout gives extensive explanations of hill and farm names in Gaelic.

- In the section on language (p. 611) he states:

  The language spoken by persons of rank and of liberal education, in English; but the language of the lower classes is Gaelic. It would be almost unnecessary to say anything of this language to those who understand it. They know its energy and power; the ease with which it is compounded; the boldness of its figures; its majesty, in addressing the Deity; and its tenderness in expressing the finest feelings of the human heart. But its genius and constitution, the structure of its nouns and verbs, and the affinity it has to some other languages, are not so much attended to. These point at a very remote era, and would seem to deduce the origin of this language from a very high antiquity.

- The language section also includes a lengthy explanation on the structure and grammar of Gaelic, accompanied by a number of examples giving the meaning and etymology of Gaelic farm names in the area.

- The writer states that there are two schools in the parish, one of which is a ‘society’ school (SSPCK). Gaelic is not mentioned as a subject or as the language of instruction and it is not stated whether the school teachers are Gaelic speakers or not.

New Statistical Account – (1837) Rev. P. Robertson

- In the section on language (p. 356), the writer states:

  Both the English and Gaelic languages are spoken in the parish, and divine worship on Sabbath in performed in both. The name of nearly every farm and hill is derived from the Gaelic. The Highland dress is not so generally worn as it was forty years ago.

- On education in the parish he indicates (p. 358) that there is a parochial school and two SSPCK schools, and that: “[i]n the parochial school, the following branches are taught: Latin, Greek, mathematics, arithmetic, book-keeping, mensuration, English, Gaelic and writing. In the [SSPCK] school at Bridge of Turk, there are taught, Latin, English, Gaelic, arithmetic, writing; and the other school is for sewing, reading, writing, arithmetic, and English grammar.”

Parish of Kilmadock
Old Statistical Account (1794), Mr Alexander MacGibbon

- The writer starts the narrative with an explanation of the Gaelic etymology of Kilmadock. Throughout the account, he explains Gaelic names and gives their meaning and his understanding of their etymology.
• In the section on language (p. 53) he states:

The language of the common people in this parish, like many of the parishes in
the neighbourhood, is a mixture of Scotch and English. This jargon is very
unpleasant to the ear, and a great impediment to fluent conversation. No
language is more expressive than the Scotch, when spoken in perfection; and, though
the accent be short and unmusical, yet it is by no means disagreeable to hear
two plain country men conversing in the true Scotch tongue; but, in this parish,
you seldom meet with such instances – In the quarter towards Callander,
the generality of the inhabitants speak Gaelic; and this is perhaps still more
corr upt than even the Scotch, in the other quarters of the parish. It is impossible
to conceive anything so truly offensive to the ear, as the conversation of these
people. The true Gaelic is a noble language, worthy of the fire of Ossian, and
wonderfully adapted to the genius of a warlike nation; but the contemptible
language of the people about Callander, and to the east, is quite incapable of
communicating a noble idea.

It ought, therefore, to be earnestly recommend to the people of this parish, and,
indeed, to other parishes in that quarter, to study a more perfect style; either to
practise the true Gaelic, the true Scotch, or the true English tongue.

• In the section on schools (p. 82) he indicated that: “[t]he parish school is held at
Doune, and is generally well attended … There are at present 70 scholars, 45 at
English, 20 at arithmetic and book-keeping, and only 5 at the Latin language”

At p. 83, he adds that: “[t]here are several other private schools in the parish, for teaching
English and the rudiments of writing” and that “The Society for Propagating Christian
Knowledge late gave L. 10 of salary for a charity school at the west end of the parish,
near Callander…placed on the road from Callander to Craigton, about a Scotch mile
east of Callander, on a gentle rising heath”

There is no mention of Gaelic instruction at any of the schools.

New Statistical Account (1844), Rev. Gordon Mitchell

• In the section on language (p. 1232), the writer indicates, drawing from the earlier
Account, that:

The language generally spoken is provincial English, with Gaelic by a few
families. The common language, in the last Account, is said to have been “a
mixture of Scotch and English.” “In the quarter towards Callander,” say Mr
M’Gibbon, “the generality of the inhabitants speak Gaelic,” as some of them
do to this day.

• In the section on education (p. 1242) he states that: “[t]here are seven schools in the
parish. Of these, one is the parochial school, three are endowed, at least partially, the
rest supported by individual subscription.”

There is no mention of Gaelic instruction and there is no specific mention of an
SSPCK school.

SCOTTISH SOCIETY FOR THE PROPAGATION OF CHRISTIAN KNOWLEDGE
(SSPCK)
The only relevant information I was able to locate through SCRAM was the report by Inspector, Patrick Butter on the SSPCK school at Bridge of Turk (11 November 1824), which states:

This school is in the parish of Callander about half way between the village and the Trosachs. Upwards of 50 scholars attend this school during winter. Gaelic is regularly taught here, it is the universal language of the district.

This is presumably the same school at Bridge of Turk which is referred to in the New Statistical Account for the parish.
